

Do you have your first power apps and flows running on the Microsoft Power Platform? A stable and secure foundation is essential to take preventive action against risks. You can define all relevant topics for clean usage with our Power Platform Governance Package.

Use the Microsoft Power Platform to deploy your full digitalisation potential and ensure even more agility. Together we analyse your current situation and define the governance of your environments for a secure, stable and scalable Power Platform based on your needs.

What does the Power Platform Governance Package include?

In a 2-day workshop, our experts share their many years of experience in setting up and providing platform governance. Together with you, we define topics such as:

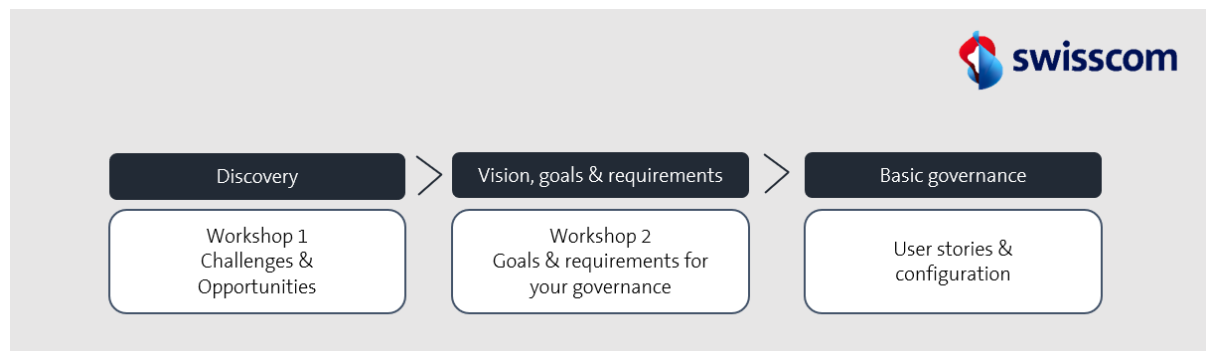

- data loss prevention / encryption
- data privacy and compliance standards
- usage and activity logging

In addition, we examine the operational aspects of the Power Platform and define roles, responsibilities, and processes.

Your benefits from Power Platform Governance from Swisscom

- **Transparency**
We identify your current challenges and introduce you to possibilities, scenarios and relevant elements such as security, monitoring and alerting of the Power Platform Governance for a successful implementation.
- **Reduced risks**
We align your Power Platform strategy with your company's digitalisation strategy and define goals and governance requirements, deriving user stories for implementation and counteracting risks.
- **Strong foundation**
We work with you to implement the selected user stories and establish basic governance.
- **Comprehensive portfolio**
Take advantage of additional offers such as professional consultations and [assessments](#). Take the next digitisation step with your [business applications](#) or benefit from support in the rollout phase as well as training of employees by our [Future Work Consulting](#) team, so that healthy implementation within the company can take place.

Our approach for the Power Platform Governance Package
