

Move to Azure DevOps!

Whatever your current model, a move to the Cloud is a key milestone in your DevOps journey.

Depending on your DevOps maturity, SWORD will help you to realize your full potential with Azure DevOps services by helping you to leverage appropriate DevOps practices and to manage Azure resources with end-to-end traceability of tasks and a move to proactive operations with the "shifting left" principle.

We will assess, plan, and implement Azure DevOps services roll-out that meets your organization and development processes.

When needed we will start the jump with a functional and technical assessment of your with current instance.

We will check that all the prerequisites for migrating your data to the cloud are ready and plan required actions (Tenant, AD, Organization, Licences ...).

We will technically validated that you instance is ready to be migration and take necessary actions.

We will prepare and run the import to your organisation with several dry-run before the final move.

Deliverable

- An Azure DevOps assessment reports of the existing, updated, future systems
- Your Azure DevOps Organization on the Cloud
- Fundamentals of Azure DevOps services trained to your key personnel

Why customers use our "Move to Azure DevOps?"
