

Copilot for Microsoft 365 Implementation Readiness

Get ready for AI with Microsoft 365

Sword's Copilot Implementation Readiness offering prepares organisations for the launch of Microsoft 365 Copilot by ensuring only appropriate business data is trained by the service, excluding sensitive information from use. The engagement enables organisations to plan for the wider deployment of Copilot by following a best practice approach.

What we offer

Our tailored approach ensures organisations have all the required technical and business prerequisites in place to support a successful implementation as well as facilitating end user adoption activities.

Microsoft
365 Copilot
