

YOU CAN COUNT ON CODEPAL

Wouldn't it be Great if your city departments could all work in sync together?

Your city building, fire, and general code enforcement departments all have so much to do. Increasing demands and decreasing budgets/headcount make getting everyone's job done very difficult. Nobody likes it when your departments are not on the same page, not communicating, even competing with each other. Each department using their own separate computer systems and databases greatly adds to the challenge. Not only are citizens poorly served but tensions can lead to poor moral and job satisfaction among city employees.

The Codepal solution

Codepal is a fully customizable permitting and mobile inspection software solution that brings your city departments together. Citizens are better served as all departments are working smoothly, sharing the same computer tools and databases. Your city staff is happy and efficient since they are now all on the same page, sharing work tasks, input on building plans, and overall strategic goals. Codepal helps you truly implement an "Others Oriented" staff culture that will enable you to do Great things for your city!

We are your city government permitting and inspection partners

Codepal is specifically focused on the goals and challenges faced by city governments such as yours. The Codepal support team provides an unmatched level of assistance to our users nationwide. Although we are a technology company, we believe strongly that living a truly "Others Oriented" culture is the key to business success and personal happiness.

WHY
CHOOSE
CODEPAL

WHY CODEPAL?

Codepal is the only safety and security inspection software built from the ground up specifically for promoting cooperation and coordination between city departments. In addition to this unique focus, we offer an unmatched level of flexibility to allow YOU to decide how to use it!

- *Built from the ground up specifically to help your building, fire, and code departments cooperate and work together*
- *Everyone has the same data: Shared database between your departments, all in sync with your county property owner/GIS system*
- *Flexible: Allows YOU to decide how YOU want to use it*
- *Staff development: Inspector knowledge and skill improves as they use Codepal*
- *Decision support: Proactively spot issues before they become problems*
- *Unmatched options: Run "in house," "in the cloud," or "hybrid"...your choice!*
- *Financial strength: Your partner in implementing and collecting fees*

CODEPAL ONLINE TOOLS

Codepal offers on-line tools to accompany our application.

Preplan Viewer is a website viewer to display your preplans in an easy to view format.

Preplan Editor is an on-line tool that feeds the data into your preplans. This tool is accessible by non-codepal users of your choice.

Codepal Forms gives a web interface for your permit applications. The applications fill in the details for your permit tracking system within Codepal.
