

# SyCom Collaboration Experience

## Combining collaboration and productivity tools into one seamless experience.

The corporate workplace is transforming, and connection is key. Businesses want to improve efficiency and retain a reliable workforce while employees increasingly seek the flexibility to work when and where they want. SyCom can help your organization build seamless communication and multi-device experiences to bring teams together, enable productivity, and drive digital transformation utilizing Microsoft 365. SyCom's in-house AV experts can enhance your teams experience through collaboration, meeting spaces and custom audiovisual experiences.

- Digital Signage & Video Walls** — Empower your company to battle digital irrelevance through improved visual communications.
- Collaboration Spaces** — Bring your devices and collaboration tools to a specialized area to whiteboard, meet, present, reflect, and explore.
- Meeting Spaces** — Gather your team—remotely, in person or both—for extended engagement with microphones, speakers, lights, and shades controlled from one central point.
- Custom Audiovisual Environments** — Have us create an audiovisual package that meets your business needs no matter the industry, including healthcare, education, government, and finance.
