

Microsoft 365 Copilot

Your Digital Assistant from Microsoft

Part of the Charterhouse Group

Copilot uses artificial intelligence to generate high-quality content, insights, and solutions across Microsoft 365 apps and services, increasing productivity and creativity.

Is your organisation ready for Copilot?

- Do you understand the business value of copilot?
- How can you ensure that your data is secure and compliant while using Copilot?
- How can you train your staff to use Copilot effectively and confidently and make the most of its capabilities?

Our **M365 Copilot Readiness Assessment workshops** can help organisations:

Understand the prerequisites

Drive innovation and integration

Manage the data compliance and security risks

Identify which users and workloads feel maximum benefit

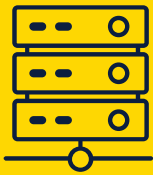

Monitor and prevent data access and exfiltration

Prepare users for a new way of working

Our Copilot workshops cover three key areas:

Information Governance and Data Management

We will help you review your existing data policies and configurations, and recommend best practices for managing your data lifecycle, access, and security while using Copilot.

Licensing and Platform

We will help you understand the licensing requirements and technical prerequisites for using Copilot, and guide you through the process of enabling Copilot in your Microsoft 365 apps and services.

Organisational Change Management

We will help you plan and execute a successful change management strategy that will drive awareness, engagement and adoption of Copilot among your staff. Our team will advise on building a business case that maximises your return on investment.

Following the workshops, organisations will be provided with a report containing -

An assessment of current readiness and a roadmap of actions to drive their M365 Copilot projects.

Best practice advice on profiling users and identifying use cases for Copilot in support of creating a business case.

Recommended adoption approach highlighting best practices.

Don't miss this opportunity to get ready for Copilot and transform the way you work with Microsoft 365. Contact us today to book your M365 Copilot Readiness workshop.
