

Industrial Manufacturing's Microsoft AI Agents created by SymphonyAI

[Ebook](#)

Industrial Data Exploration and Investigation Agent

[More details](#)

Empowers engineers and analysts with AI-powered search, root cause analytics, and anomaly detection across vast, complex OT/IT data landscapes.

CUSTOMER VALUE

Accelerates diagnostics, reduces incident investigation time, and unlocks new optimization opportunities. Empowers users to move from raw data to decision-ready intelligence quickly and accurately.

Intelligent Search

Leverages semantic search to find relevant signals and data patterns across multiple data silos and types.

Root Cause Identification

Uses AI to trace incidents and anomalies back to probable causes, accelerating investigation and prevention.

Anomaly Detection

Continuously scans process and machine data for outliers, alerting teams to emerging issues before they escalate.

Automated Insights

Surfaces actionable recommendations and generates investigation reports for faster, more informed decision-making.

About SymphonyAI

SymphonyAI is building the leading enterprise AI SaaS company for digital transformation across the most critical and resilient growth verticals, including retail, consumer packaged goods, finance, manufacturing, media, and IT/enterprise service management. SymphonyAI verticals have many leading enterprises as clients. Since its founding in 2017, SymphonyAI has grown rapidly to 3,000 talented leaders, data scientists, and other professionals. SymphonyAI is an SAIGroup company, backed by a \$1 billion commitment from successful entrepreneur and philanthropist Dr. Romesh Wadhvani.
