Why a Modern Workplace offer ?

Microsoft has changed **its update model** on both the operating system and office tools **to meet accelerated business needs**. This induces the need to review the **life cycle of workstations as well as the related tools** and organization.

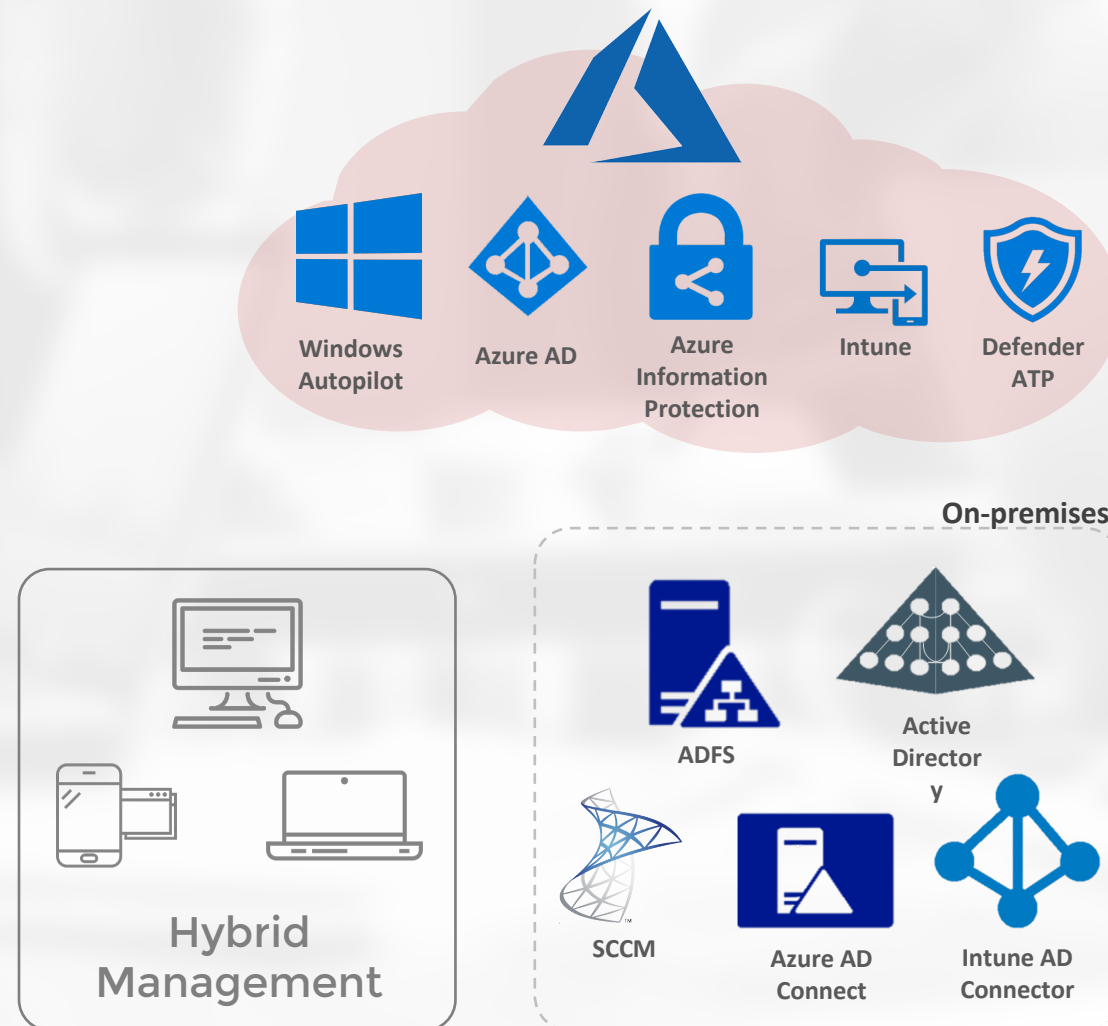

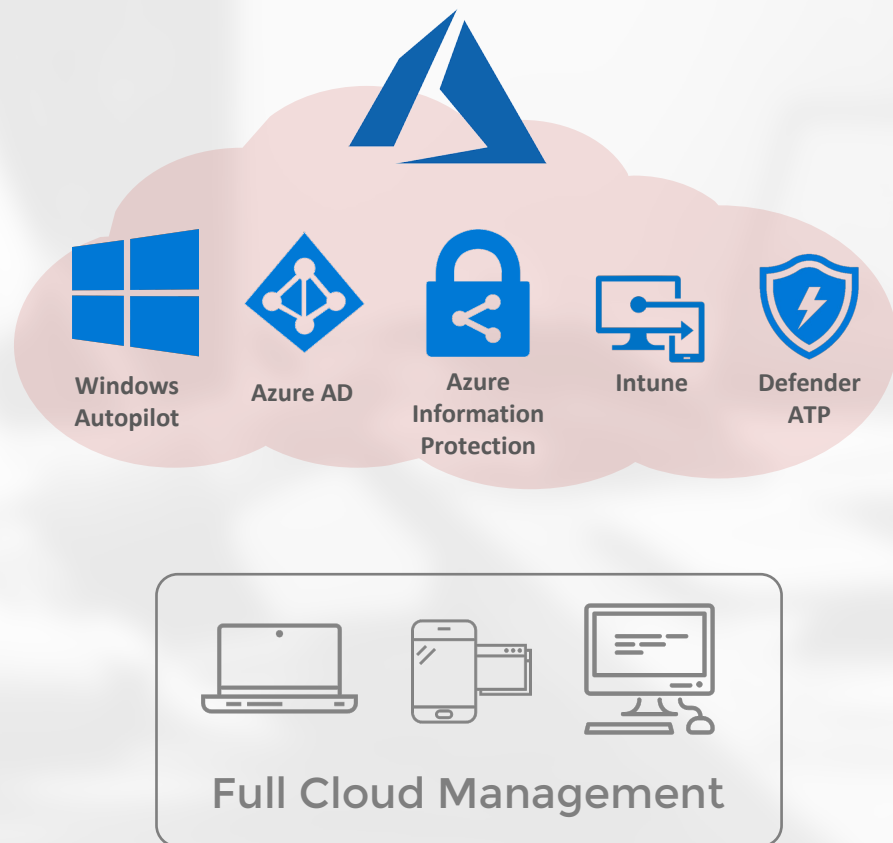

The development of **mobility and remote work** requires being able to manage positions within and outside the company with the same level of service, while preserving **employee productivity**.

The development of **mobility, GDPR and cybercrime activities** requires companies to thoroughly review the security strategy for the work environment of users.

Our offer aims to reduce the time-to-market of business solutions by providing a secure Azure professional environment that is as agile as possible.
