InciTrak

Health & Safety Incident Management Application for reporting injuries at workplace

InciTrak is a powerful digital solution built to simplify and standardize health & safety incident reporting. Initially developed for the education sector and in use across schools in the UK, this RIDDOR-compliant platform is fully customizable for other high-risk industries such as construction, transportation, manufacturing, and more.

InciTrak in a Nutshell

- Enables fast, structured reporting of incidents and near misses, from any device.

- Captures photos, descriptions, and categories in real time.

- Triggers automated notifications to key stakeholders.

- Offers a central dashboard for clear visibility, reporting and compliance tracking.

- Fully customised to your terminology and processes.

Key Features

Body Map Selector: Visually pinpoint injury locations for better context and record-keeping.

Draft Mode: Save and complete forms later for greater flexibility during incident intake.

Role-Specific Access: Local Communication Admins, Investigators, Leadership & National Teams

Comprehensive Audit Trail: Maintain secure, timestamped records for legal defensibility and compliance audits.

Talk To Us!

If the solution doesn't meet 100% of your needs out-of-the-box, our team is ready to customize it to fit your workflow, industry, and compliance standards.

Testimonial

"Since rolling out InciTrak across our sites, incident reporting has gone from chaotic to crystal clear. Our teams can log issues on the spot, and we're finally confident in our RIDDOR compliance. It's transformed how we manage safety." Health & Safety Officer
