

## THE NEW WAY

Sync1 Systems is a FinTech CUSO offering a 100% cloud-based loan origination technology that automates loan-processing workflows, increases loan revenue and market share quickly. With a best-in-class end user experience, industry leading cascading auto decision and risk-based pricing engine consisting of a robust library of business rules and tables, we are helping our clients grow to the next level.

The system is easily configured and managed from the business user level with the help of our delivery team requiring very limited IT resource to implement and support. The ability to dynamically configure the workflow, each user can perform their tasks and responsibilities more efficiently, consistently, and compliantly. Additionally, end user training goes from days with most systems to hours with Sync1 Systems given the workflow automation capabilities.

Designed and developed using the latest technology and infrastructure, possessing true real time disaster recovery and both SOC 2 and SOC 3 Certifications, Sync1 Systems is The New Way in the loan origination space.
