

# Syncier Cloud

Your Cloud Native journey

## Why Syncier Cloud?

To keep pace with the ever-increasing customer requirements in the digital world, supervised companies (e.g., by BaFin) should use their capacities intelligently. With our profound expertise in handling sensitive data in the Cloud, we are precisely the right partner for your cloud transformation.

## Our Professional Services

Syncier Cloud guides your company on its journey to a secure and compliant cloud - at any point in your transformation process.

- **Cloud-Native Strategie-Bootcamp**  
Together, we define your personalized Cloud transformation roadmap
- **Cloud-Native Readiness Check**  
We analyze your existing digital products regarding usability and added value of migration into the Cloud
- **Cloud-Native Lab**  
Together, we develop a lighthouse project to boost your cloud-native transformation
- **Plattform Co-Engineering**  
We assist you in the development of your platform architecture with CI/CD, continuous security, and data services

## Our Milestones

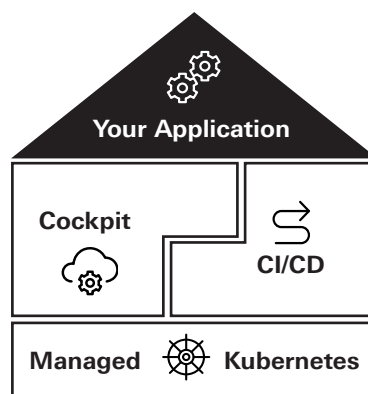

- ✓ Fully managed cloud platform for regulated customers with a 24/7 service desk
- ✓ Our Software assists your developers in keeping their applications secure and compliant
- ✓ Contributions to open source projects like Argo CD, Helm, and Jenkins
- ✓ Syncier is the host of the Enterprise Cloud Native Summit 2019 with more than ten speakers from different industries

## Our Managed Services

Syncier Cloud bridges the gap between public cloud providers and the needs of application developers. Focus on your application development while we take care of the security and compliance demands of the cloud infrastructure in a highly regulated environment.

- **Syncier Cloud Cockpit**  
Multi-cloud control dashboard with focus on security and compliance
- **Managed Enterprise CI/CD**  
Enterprise-ready managed CI/CD tool stack
- **Managed Kubernetes**  
Secure and compliant multi-cloud Kubernetes-as-a-Service (KaaS)
