

Security and Surveillance

Synergy Software

Situational awareness and operational control anytime, anywhere and on any Synergy device.

Surveillance is no longer constrained to control rooms. Today's solutions must align with IT and operational requirements in a secure, efficient and compliant manner without escalating costs.

Synergy is an integrated, collaborative, command control and communications platform that provides the vital tools to ensure your control room and field personnel have the information at their fingertips to provide an effective and efficient response.

Enhanced Operations

- Improve efficiency by removing silos
- Easily implement standard operating procedures
- Manage resources more effectively

Anytime, Anywhere

- On-premise, web and mobile
- Collaborate quickly and easily
- Authenticated, permissions-based access

Scalable and Secure

- Modular and flexible open platform
- Cybersecure, zero-trust
- Proven uptime

“Our aim is to ensure the City is the safest city area in the world. Synectics shares our vision for the future of fully integrated public space security and surveillance and we are confident their team can provide a future-proof platform to help us achieve the aims of ourselves and the City of London Corporation”

T/Commander David Evans, City of London Police

SYNECTICS

Synergy enables scalable alignment of surveillance and operations

Worldwide Protection of Critical Assets

- Tailorable to your standard operating procedures
- Relied upon in critical operational environments worldwide
- Protection of assets, effective response

Synergy in Azure Cloud

- Cost-effective video storage
- Adapt and scale storage requirements easily
- Enable in-the-field surveillance and operations and ensure information security

Cybersecure and Compliant

- Constantly evolving to tackle new cyber and information security threats
- Secure evidence management and audit trail

Why Synectics?

Renowned public authorities, transport operators, oil & gas producers and casinos select Synergy for peace of mind.

This is because it's a field-proven surveillance solution built using Synectics deep industry expertise, where security and surveillance are critical.

What does this give you?

- Integrated anytime, anywhere surveillance and operational management
- Scalable and cost-effective cloud-native storage that adapts to your needs
- Information security and system uptime

Our Promise

We don't believe in one-size-fits-all, and our modular systems ensure a tailored fit from day one.

During a no-obligation consultancy, we will:

- Listen to your challenges
- Demonstrate how Synergy can help
- Give you confidence we can deliver your needs
