

Enterprise Integration Center of Excellence saves time & money

ABOUT SYNEGRATE:

Synegrate provides business digitization services to drive high value business outcomes. Our key differentiator is to achieve complete customer satisfaction through our superior gold-standard client service-based approach.

See what customers are saying:

"We were feeling the pain of not being able to provide a global platform that was serving our customers' best interests. The Synegrate team's extensive expertise in integration led them to this solution, it's a scalable, maintainable environment that essentially takes care of itself."

- Drew Story, Solutions Architect - Patagonia

WHAT WE OFFER

The Integration Center of Excellence provides the strategic foundation that underpins the IT strategy to facilitate a formalized approach to Enterprise Integration within the organization, ultimately resulting in higher quality integrations, greater ROI with improved TCO.

The strongest tenet of an Integration strategy is the people, processes and policies that govern it. The Azure platform is a key enabler for the integration strategy, allowing us to put in place the governance needed for growth, with a platform that supports and enforces it.

Organizations with an Integration Center of Excellence will be more agile to the evolving needs to the business, while maintaining strict security, standards and quality with a reduced time to market and lowered operational costs.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
