

## Let's take stock!

Synergy Technology understands the complex demands of the wholesale, logistics and distributions sector.

Designed for SMEs operating in the wholesale, logistics and distribution sector looking for a fully integrated solution.

During the two onsite days Synergy Technology will assist you in reviewing your business and processes and help you to understand if Dynamics 365 Business Central is the right fit for your business.

The Feasibility Assessment is a valuable resource designed to provide a full understanding of your current business situation and identify your wants and needs for the new system.

After a comprehensive Two-Day fact-finding exercise we provide you with an outline to help brief a service provider in order to the implement Dynamics 365 Business Central.

### A PROFESSIONAL ASSESSMENT SERVICE

The Two Day Service is split into two main sections:

**DAY 1:** On visiting your premises, our professional consultant looks to understand the business and assess current system processes, discover how staff operate and discover your current documentation process. This then allows Synergy Technology to review which features within Business Central would best suit your organisation and how to configure the system to meet your needs.

**DAY 2:** We continue the appraisal referring to the pre-analysis documentation completed by your business. Synergy Technology will run through each of the department processes and highlight aspects covered in DAY 1.

### Your team get involved:

Suitable for UK based SME working in the wholesale, logistics and distribution sector, our Two-Day service is delivered on-premise at the same location over two consecutive days.

It is necessary to gain the right information that key decision makers are on-site and available for interview during the two day assessment.

### We deliver in an outline document including:

- Recommendations offered on how to set up the Business Central software.
- Synergy Technology will openly discuss the items Business Central will not cover.
- We can make recommendations regarding add-ons and modules that you might find useful.
- We will discuss your team's expectations regarding a new solution and will provide you with valuable and positive reasons to adopt to a new system.

## Get an end-to-end view of your business

### Manage your financials

Accelerate financial close and report with accuracy, while ensuring compliance.

### Automate and secure your supply chain

Increase visibility across your supply chain and gain greater control over your purchasing process.

### Sell smarter and improve customer service

Maximise revenue opportunities and better serve customers with built-in recommendations.

### Keep projects on time and under budget

Manage budgets and monitor progress of your projects with real-time data on available resources.

### Optimise your operations

Streamline your manufacturing and warehousing operations to deliver products on time and reduce costs.

### Learn more about your business

Priced at £2,000 the Two-Day Dynamics 365 Business Central Feasibility Assessment offers excellent value for money and is a great way to explore your business requirements and gain a full understanding of your current business situation and identify your wants and needs for the new system.

Contact Synergy Technology to discuss your requirements on 0345 456 0050.

PLEASE NOTE: In order to maximise the information gained from the fact-finding exercise, your business will need to appoint department leads to go through all aspects that their department job roles entail prior to the start of the exercise.

The Pre-analysis documentation provided as part of the service must be completed by your business before the Assessment/Evaluation Service is carried out, in order to achieve maximum results and a more valuable report.

Working with business in this sector for over 20 years, Synergy Technology understands the complex demands of the wholesale, logistics and distribution sector.

Synergy Technology's complete business solutions for the logistics and distribution industry sector is proven to give effective control of margins, inventory costs and supply chain management.

Implementing Dynamics 365 Business Central provides a total solution from stock analysis to delivery and returns with traceability of all stock items. Dynamics 365 Business Central can help you to manage quotes, and includes sales order processes, with full general, sales & purchase ledgers as standard.

"Whether it's the development or dealing with support issues, Synergy Technology has always maintained the highest level of service and we look forward to continuing our business relationship with them long into the future."
