

E-Migrator

Zoom To Teams Migration: Fast, Easy, and ROI-Focused

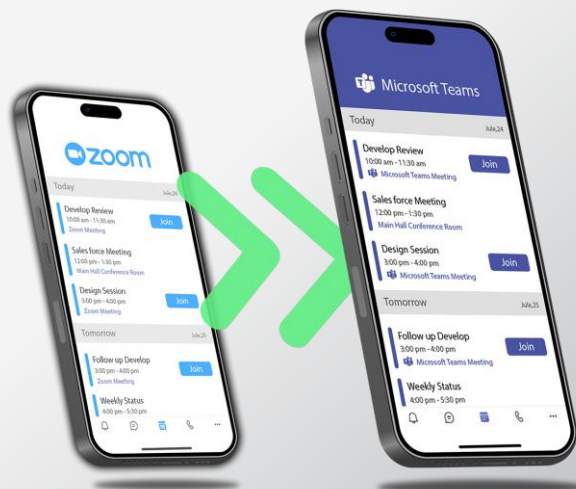

Migrating from Zoom to Microsoft Teams enables organizations to fully leverage Teams’ robust capabilities, along with integrations with other Microsoft 365 workloads, resulting in significant cost savings and an enhanced collaboration experience. Without the right tools, this process can become lengthy, costly, and error-prone.

To support this process, Synergy Advisors developed **E-Migrator Zoom To Teams [Z2T]** — a solution that simplifies the migration of workloads from Zoom to Microsoft Teams in a structured and efficient way, tailored to your organization’s specific needs.

What is E-Migrator [Z2T]?

E-Migrator [Z2T] is a solution that streamlines the migration process from **third-party platforms to the Microsoft 365 ecosystem**. It enables the automated and efficient transfer of both historical and future Zoom data — including configurations, meetings, users, and recordings — to Microsoft Teams and other Microsoft 365 workloads.

With E-Migrator, organizations can execute a structured, secure, and needs-aligned transition that enhances collaboration and operational continuity.

Our solution provides a comprehensive set of tools that enable you to successfully transition to Microsoft Teams:

Discovery

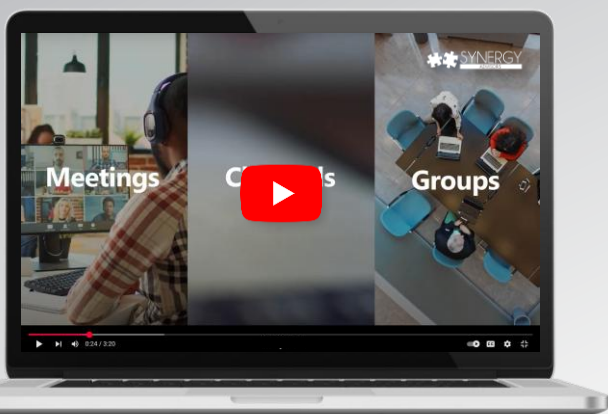

- Seamless discovery of historical and upcoming activities, as well as configurations performed in Zoom.

Planning

- Define your migration strategy through our advanced analytics tool.
- Change management insights on users with more Zoom activity, identifying scenarios that may require more training and assistance during the transition

Migration

- Execute a full (big bang) or phased migration of your Zoom capabilities and objects to Microsoft Teams, based on a clear and structured plan previously defined and aligned with your organization’s needs.

- Cost savings:** Migrating 5,000 users from Zoom to Teams saves \$950,000 per year by removing redundant licenses.
- License Optimization:** With Microsoft 365 E3, eliminating duplicate tools can save \$360,000 annually for a 500-employee company.
- Operational Cost Reduction:** Teams saves up to 70 hours per user per year and cuts IT workload by 45%, avoiding up to \$240,000 in redundant costs.

What does E-Migrator [Z2T] do?

Meetings

Future meetings

- Migrate from Zoom to Teams
- One-time and recurring sessions

Past meetings

- Preserve past meetings in M365/Azure: Recordings, Transcripts, Chats, and Attachments.

Channels

Replicate structure in Microsoft Teams

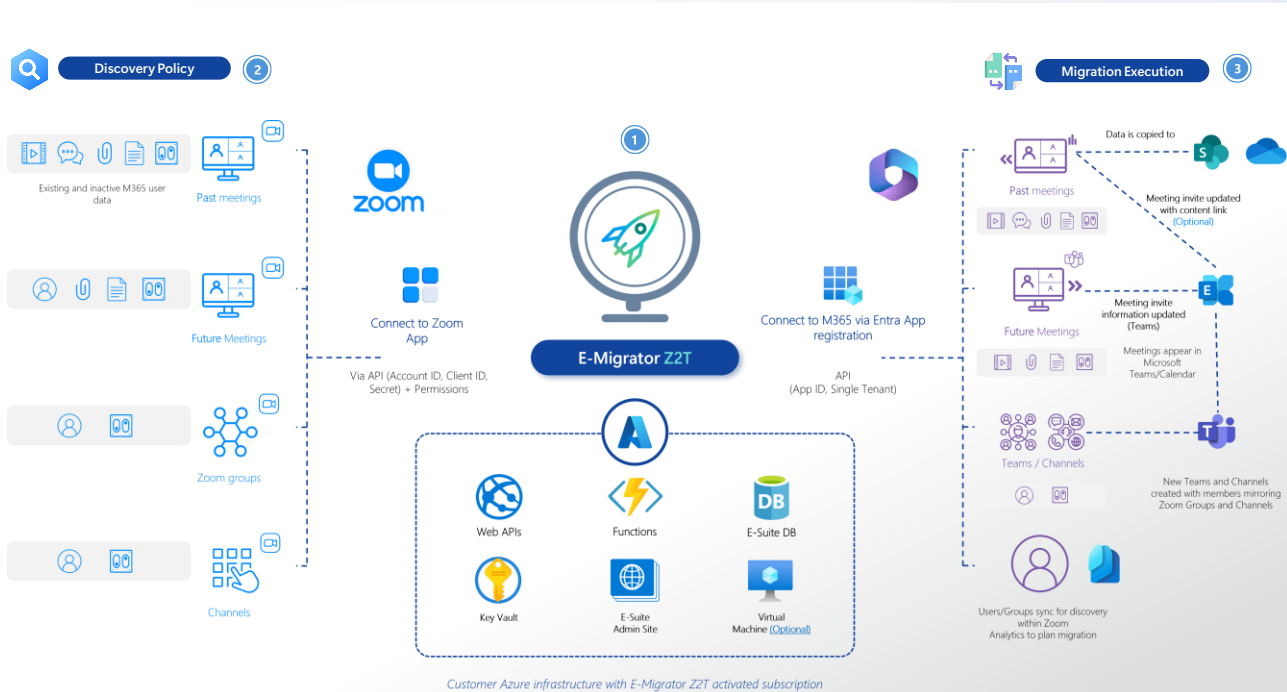

- Automatically add corresponding members
- Apply permissions automatically

Groups

- Replicate Zoom group structures within Microsoft 365 and Microsoft Teams to preserve user organization and access configurations.

How does E-Migrator [Z2T] work?

1

E-Migrator [Z2T] connects to Zoom to identify past and future meetings, channels, and groups, enabling a clear definition of what will be migrated.

2

From your organization's Azure environment, E-Migrator [Z2T] prepares and manages the migration process, securely linking Zoom with Microsoft 365.

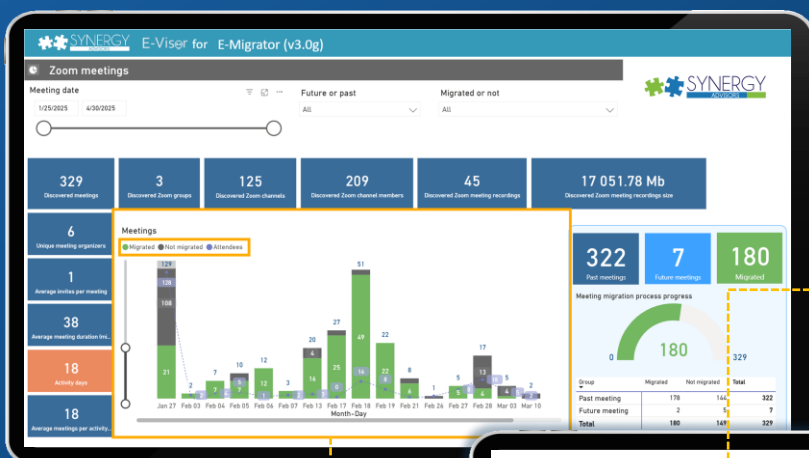

3

E-Migrator [Z2T] migrates meetings to Teams and Outlook, stores content in SharePoint, and replicates Zoom's structure as Teams and channels in Microsoft Teams.

Measure Teams adoption and facilitate decision-making

Synergy Advisors complements your migration strategy and facilitates decision-making with rich analytics from intuitive and comprehensive Power BI reports:

- Review initial phased migration activities
- Discover any continued use of Zoom in the organization
- Understand post-migration analytics
- Remediate users missed in the migration

Details participant info (name, organization, domain), ensuring traceability and correct user inclusion.

Shows the list of meetings along with their migration status, enabling quick tracking of what has been successfully migrated and what is still pending.

Shows migrated and non-migrated meetings, and attendee volume per day, helping monitor progress, workload, and user impact.

Meeting details

| Meeting ID | Template removed | Group | Discovered meetings | Migration status | Attendees | External attendees | Internal attendees | Topic | e-Mail |
