Meeting Management

Make **Teams** your go-to for everything

Focus on optimizing collaboration and teamwork with a single-pane view of every meeting held, including the actual time spent in collaboration meetings and ad hoc calls. With the My Team feature, managers can complete their tasks quicker and employees can review how they have spent their work time.

E-Visor for Teams App Essentials the right solution for **all** your users, giving them:

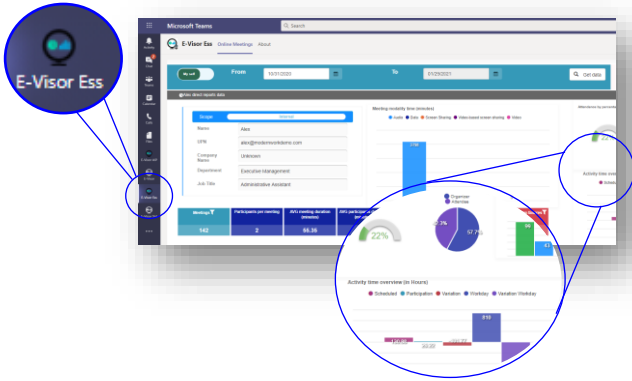

- ✓ A first-hand approach to the Teams Meeting summary
- ✓ Most relevant information and stats
- ✓ The Who, When, How, everyone has joined your meetings
- ✓ Direct Report data, Teams Activity, Meeting details, Future Meetings

Self-deploy Office 365 Apps fast, easy, and in one click, making sure the latest updates are always available and that you are working with the best services available

Giving this set of tools to your users without the need to change their permissions within the tenant will relieve your Help Desk cost to a fraction of the current expense and empower your colleagues to adopt the cloud faster than ever.

Get these and more amazing analytics in other version of E-Visor: Standard and Advance, including time spent in meetings, geolocation, cloud adoption/usage and a hands-on remote team management

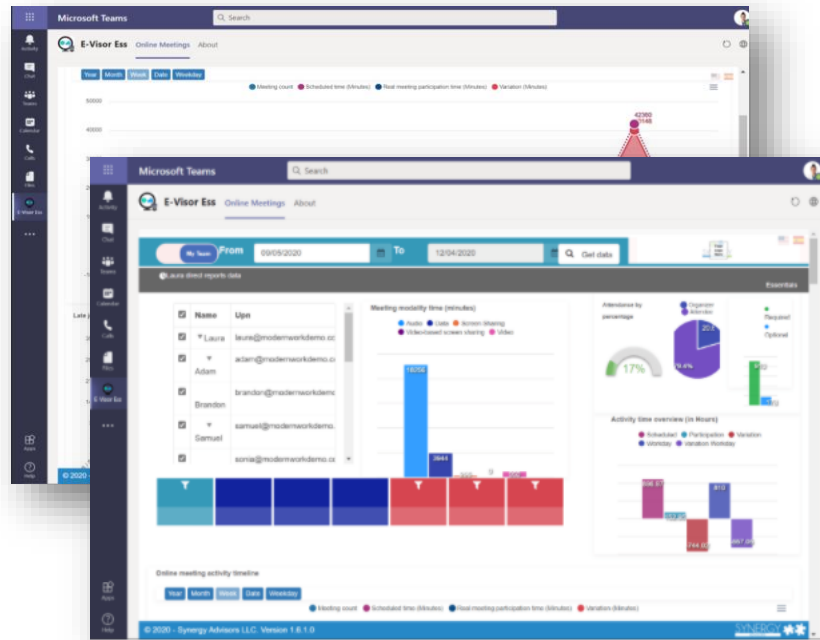

Review your Teams Meeting data, and those of your direct reports:

- Meeting participation
- Percentage of participation
- Past and Future Meetings
- How many meetings are they having?
- Issues with joining a call?

Get a summary of the meeting data, drops, failures, late joins, and so much more.

Who are the attendees to your meetings? Did they join via a phone, pc or other device? Start times/end times stats and the meeting modality time: Audio, Data, Screen Sharing, Video
