

E-Visor

Entry/Basic

Create self-sufficient users

Optimize support times

Provide visibility where there was none

Reduce Help Desk costs

Make **Teams** your go-to for everything

If your organization has already jumped to the cloud, you are already familiar with Microsoft's many amazing collaboration tools and services, but also its numerous reports, data points and admin portals. Trying to make sense to all that information is time consuming and requires a set of very specific roles within your tenant, making it available to a very limited number of users.

E-Visor App is the right solution for **all** your users, giving them:

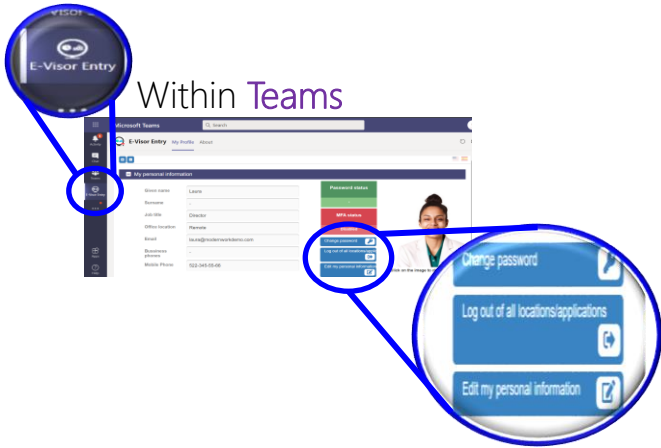

- ✓ A first-hand approach to their activity summary
- ✓ Most relevant links and sites in SharePoint
- ✓ Device information at 1-click to optimize support
- ✓ Much more.

Self-deploy Office 365 Apps fast, easy, and in one click, making sure the latest updates are always available and that you are working with the best services available

Giving this set of tools to your users without the need to change their permissions within the tenant will relieve your Help Desk cost to a fraction of the current expense and empower your colleagues to adopt the cloud faster than ever.

Get these and more amazing analytics in other version of E-Visor: Essentials, Standard and Advance, including time spent in meetings, geolocation, cloud adoption/usage and a hands-on remote team management

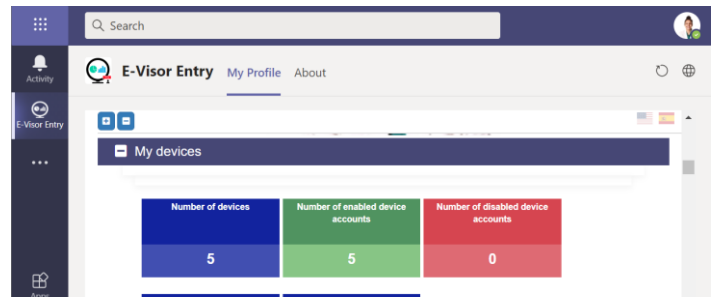

Review and edit their current status within Azure Active Directory including

- Name
- Office Location
- MFA and Password status
- Business and Mobile phone numbers
- Password reset

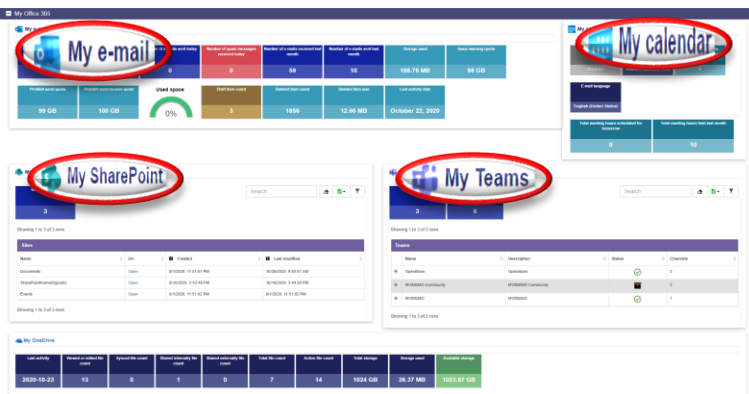

Get a summary of their linked devices to their account, if they are enabled and managed. Knowing their linked devices facilitates decision making, letting users differentiate between work and personal devices and use them accordingly.

BONUS!
E-Visor **Basic** also provides self-inventory with OS Version, Build and Support End Dates!

Type	Name	OS	OS version	OS build	Support end date	Account enabled
Windows	SYNERGY-2109	Windows	1909	18363.1139	May 10, 2021	✓
Windows	MW-CLT01	Windows	2004	19041.572	December 13, 2021	✓
Windows	MSI	Windows	1909	18363.1139	May 10, 2021	✓
iOS	iPad de Vanesa	iOS	-	1	-	✓
Windows	MDE-VARIAS-79	Windows	1909	18363.1139	May 10, 2021	✓

With just one quick gaze, users can find:

- **My Email:** recap of total emails sent, received and read both today and during the entire last month.
- **My Calendar:** total hours scheduled in meetings for tomorrow
- **My SharePoint:** sites I am part of and its direct links.
- **My Teams:** Teams and Channels I am a part of, its status and direct link to communicate with each channel.
