SENSITIVE INFORMATION PROTECTION

Assessment and scanning for structured data at rest

INFORMATION PROTECTION CHALLENGES

THE REALITY OF TODAY'S BUSINESS

- Users have access to multiple communication channels

- Users access data from multiple, and possibly unprotected, devices

- Uncontrolled access to sensitive information

- Lack of security controls to properly manage files

- Lack of good practices in the protection of information

- Lack of analytics for information security decision-making

SENSITIVE DATA IS EVERYWHERE

- Credit card numbers
- Financial information
- Social security numbers
- Intellectual property
- Personal information
- E-mail password
- Intellectual property
- Confidential medical information
- Biometric or genetic information

- Patents
- Business and marketing plans
- Customer and suppliers' information
- Financial data
- Intellectual property
- Patents
- Applications access credentials
- Sales secrets
- Pricing information

Protection of sensitive information directly affects regulatory compliance

THE USER IS THE WEAKEST SHACKLE IN THE SECURITY CHAIN
NEXT LEVEL OF PROTECTION

Even at rest, your data is dynamic with multiple servers and locations, multiple access vectors and actors, multiple copies of the data, and multiple administrators. **Keeping control is complex!**

INTRODUCING EDOs: E-SUITE DISCOVERY OFFERINGS FOR DATA GOVERNANCE

Synergy Advisors offers you the way to enhance your **data governance** and information protection strategy through the E-Suite Discovery Offering (EDO): **assessments and scans carried out on your on-premises, multi-cloud, and software-as-a-service (SaaS) data locations, enabling you to proactively discover, protect, and manage sensitive information within your organization.** Discovering what type of data, where it is located, and who accesses it in your organization is the most effective first step to develop a protection and mitigation strate-

We can help you build an inventory and analysis of your data at rest to
establish a data protection and mitigation plan

Discover what kind of sensitive information you have and where it is	Understand who is accessing your sensitive information and in what way	High-level action plan to optimize your security controls
