

# Windows in the Cloud Assessment

Synergy Advisors Offering

# Zero Trust Solutions

## Secure E-mail

- Strong user authentication and protection
- Compliant Device Access
- Control Application usage
- Prevent Data Leakage
- Email Platform Configuration
- Protect against threats
- Tune alerting and reporting

## Secure Collaboration

- Strong user authentication and protection
- Control access by user, device, and risk
- Harden and protect the collaboration platform
- Defend against advanced threats
- Advanced data protection and encryption
- Secure external Collaboration

## Device Protection

- Strong user authentication and protection
- Establish security and compliance baseline protection
- Sanctioned and unsanctioned application control
- Data protection on the endpoint
- Advanced threat protection

## Information Protection

- Strong user authentication and protection
- Automatically discover sensitive data
- Classify, protect, and encrypt your most sensitive files
- Data retention and deletion
- Secure external Collaboration

## Threat Protection

- Strong user authentication and protection
- Defend the endpoint from advanced threats
- Protect your cloud, apps, and infrastructure
- Advanced monitoring, service analysis, alerts and notifications

## Platform Protection

- Establish security baseline
- Streamline cloud infrastructure entitlement management
- Integrate advanced cloud security controls
- Protect against cloud threats
- Advanced monitoring, service analysis, alerts and notifications

## Secure Access

- Strong user authentication and protection
- Advanced cloud security solutions and integration
- Protect against cloud threats
- Advanced monitoring, service analysis, alerts and notifications

## New workplace scenarios and AI increase IT concerns...

**25%**

of IT leaders said they are concerned about infrastructure costs for GenAI models and training.

**78%**

of AI users are bringing their own AI tools to work (BYOAI).

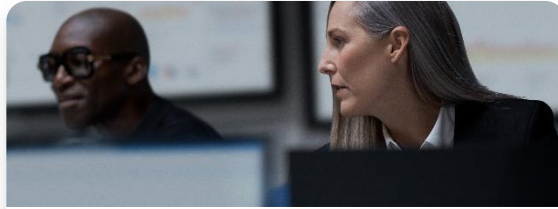

**34%**

of IT and business leaders say delivering the same technology experience for people in hybrid and remote working scenarios continues to be a challenge.

## Data security

Improve regulatory compliance and IP protection via data centralization and a reduced threat surface.

## Disaster recovery

Help ensure continuity and access for your workforce and company data, even in the most challenging circumstances.

## BYOPC programs

Enable secure Cloud PCs, even on personal devices.

## Hybrid work

Provide flexibility to access resources securely and work from anywhere.

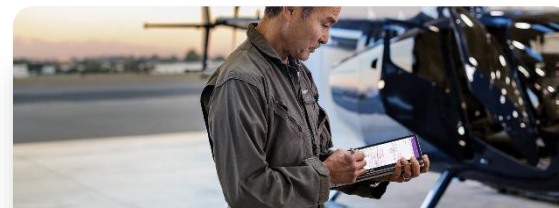

## Temporary workers

Simplify and accelerate the onboarding and offboarding process for elastic workforces.

## High-performance computing

Cloud-scale compute and storage to support specialized workloads such as design and manufacturing.

## Limited or shared physical device

Give frontline and shift workers affordable Cloud PCs without the hassles of sharing physical PC resources.

## Mergers & Acquisitions

Provide seamless transitions and access for growing businesses.

# Modernize your endpoints with Windows in the Cloud

Windows in the Cloud Assessment - Overview

## Windows in the Cloud Assessment

# Objectives

- **Discover**  
Uncover your organization's business needs and goals for a Windows in the Cloud solution.
- **Business Case Study**  
Conduct an in-depth analysis of adopting a Windows in the Cloud solution, leveraging Windows 365 and Azure Virtual Desktop to boost productivity and optimize costs.
- **Next Steps**  
Define a clear roadmap and agree on the next steps for implementing the proposed solution.

# What we'll do during this assessment

## Collect detailed information

On your business requirements and objectives to thoroughly understand the need for a Windows in the Cloud business case.

## Showcase the business value

of Windows 365 and Azure Virtual Desktop, demonstrating how they provide a powerful, flexible, and secure solution for virtual desktops and applications, enhancing productivity and optimizing costs.

## Collaborate on building a business case

by aligning identified user personas with Windows 365 and Azure Virtual Desktop product offerings, analyzing costs and benefits, and assessing potential risks..

## Develop a strategic plan

outlining the next steps for adopting the proposed solutions, ensuring a smooth transition and successful implementation.

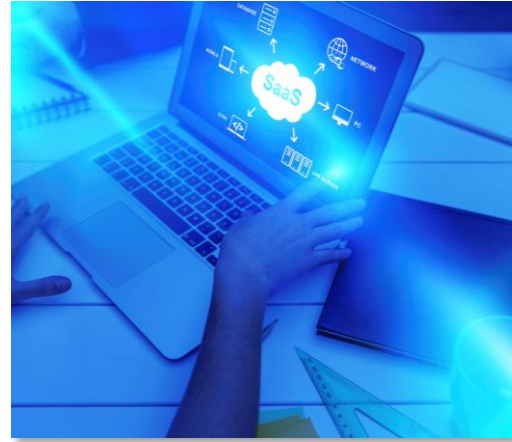

## Business Requirements Insight

Gain a clear understanding of your business requirements and objectives for implementing a Windows in the Cloud solution.

## Detailed Business Case Study

Receive a comprehensive business case study tailored to adopting a Windows in the Cloud solution using Windows 365 and Azure Virtual Desktop

## Accelerate Cloud Management

Accelerate your journey towards efficient cloud-based endpoint management and end-user computing with Microsoft

## Defined Next Steps

Have clearly defined next steps tailored to your organization's needs and objectives for adopting the proposed solution

# Target Audience

## IT Management decision makers

### C-Suite

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Chief Technology Officer (CTO)

Endpoint and VDI management owners/decision makers

## Other roles

- Architects/SMEs focused on End User Computing, Endpoint Management, Security, Virtual Desktop Infrastructure and Azure
- Application business owners
- Business Unit Managers

## Why choose us?

### Consulting Services

**+12 years & +100 Top customers**

We support our customers in the correct implementation of Microsoft solutions, aimed at improving their security postures and Modern Work, accompanied by a strategy that seeks to increase the adoption of these technologies and generate more upsell and cross-sell projects

### Managed Services

Leverage cybersecurity experts to review and monitor organizations' Microsoft 365 and Azure infrastructure and security. In-depth assessments of cloud applications, deployments as we help draft prioritized plans for improvements based on organizations unique security goals. Highly trained staff who monitor end-user activity through robust log analysis to provide you reliable monitoring, proactive and reactive incident response, and troubleshooting support.

### Solutions (E-Suite)

Synergy Advisors' E-Suite seamlessly integrates various products with Microsoft 365, extending its features to address common advanced use cases encountered in organizations we've partnered with.

- E-Visor
- E-Visor Teams App
- E-Inspector
- E-Cryptor
- E-Vigilant
- E-Migrator

## E-Visor

- Enterprise-wide analytics
- Reporting, drill-down, and analysis
- Data correlation across Microsoft 365 workloads and beyond
- Adoption and security insights
- Microsoft 365 configuration best practices
- Licensing usage and activity

## E-Visor Teams app

- Scoped analytics
- Alerts and notifications
- Self-service actions
- Different user experiences and actions
  - End user, Manager, Support/IT
- Scenarios
  - Modern Work (O365 Meetings, collaboration)
  - Security (Defender)
  - Compliance (Purview)
  - Identity (Entra)
  - Devices (Intune)

## E-Cryptor

- Sensitive data lifecycle management
  - Baseline
  - exception
- Self-service document access request
- Workflow-based advanced collaboration
  - Internal
  - Business to Business (B2B)
- LOB application integration

## E-Inspector

- Data at rest structured and unstructured inventory and content inspection
- Business and compliance driven actions based on
  - Data state (Stale/duplicates)
  - Data Sensitivity (Content)
  - Data Location
  - Access type
  - Access profiles

## E-Vigilant

- Advanced security and modern work alerts and notifications
- Workflow based + Chatbot experiences (E-Bot)
- Business and technical incident management
  - Ticketing systems integration

## E-Migrator

- Assess, discover, and analyze past and future meetings
- Zoom to Teams [Z2T] migration
  - Past meetings Recordings
  - Upcoming Meetings
