

Mail Airlift

Ready to make the move to Exchange Online?

It's easier than ever to provide your users with the enterprise class email they need to stay productive. Automatic patching eliminates the time and effort of maintaining your system. Give your users an In-Place Archive, so they can keep all of their important data in one place. And provide them with anywhere access to email, calendar, and contacts on all major browsers and across devices.

Our **Mail Airlift** identifies and prioritizes Exchange Online capabilities to increase the overall business value delivered by Office 365. It assesses customer requirements for Exchange Online and provides guidance on pre-requisites, migration readiness, migration paths, security requirements, retention requirements, and third-party integrations.

Built for your business

- **Collaborative tools**
 - Connected experiences enable sharing and discovery across applications and platforms
- **Simplified security**
 - Centralized management with intelligent, built-in security and compliance features
- **Maximum mobility**
 - Securely view, co-author, and share files in the cloud with mobile asset controls on the go

Our Mail Airlift services:

- **Minimize Business Disruptions:** Our goal is to make sure that you have a stress-free migration experience. We plan every migration with the goal that the end-user doesn't even know it happened.
- **Increase Your Security Posture:** Phishing attacks...compromised credentials...we know these concern you. They concern us, too. We approach every mail migration with an eye on security.
- **White Glove Support:** We provide both on-site support and a dedicated support number during the go-live process. Relax, we've got you covered.
