Successful Mergers, Acquisitions, & Divestitures are Dependent on your IT Migration Plan

Scary thought, isn't it?

The one thing that can make or break the process is how well the IT integration project goes. M&A transactions have a defined transition services agreement that says how long the new company can use the old company's IT systems. Most IT organizations aren't prepared to cutover all IT systems at once to the new entity—**in fact, most don't even know where to start.**

Synergy Technical has the experience you need. We have successfully worked with private equity firms around the globe to make sure the IT integration is smooth and seamless—and meets your transition services agreement deadlines**.**

- **Pre-Assessment Migration Planning, Inventory and Assessment** – Quickly understand the current environment and potential pitfalls during a migration

- **Platform Migration, Consolidation and Restructuring** – Minimize risks and disruptions to end users with expert guidance from certified engineers, project managers, communications leads and trainers that have real M&A experience

- **Platform Coexistence** – Ensure you have the right coexistence strategy for your organization during a transition

- **Communications** – Have the right communication plan from the beginning by knowing what and when to communicate to the business

- **Project Management** – Meet your timelines with experts that have managed project teams and migrations within your business sector

- **Resourcing** – Augment your staff during this critical transition to give your team and the business the support they require
