

Microsoft Sentinel Workshop

Workshop highlights

Understand the features and benefits of Microsoft Sentinel.

Gain visibility into threats across email, identity, and data.

Better understand, prioritize, and mitigate potential threat vectors.

Create a defined deployment roadmap based on your environment and goals.

Develop joint plans and next steps.

“With everything running through Microsoft Sentinel, we’ve reduced the time spent on case management and resolution of alerts by approximately 50 percent.”

—Stuart Gregg, Cyber Security Operations Lead, ASOS

Security information and event management (SIEM) solutions built for yesterday’s environments struggle to keep pace with today’s challenges – let alone tomorrow’s unimagined risks.

That’s why Microsoft developed Microsoft Sentinel, a fully cloud-native SIEM.

See and stop threats before they cause harm with an Microsoft Sentinel Workshop

Microsoft Sentinel delivers intelligent security analytics and threat intelligence across the enterprise, providing a single solution for alert detection, threat visibility, proactive hunting, and threat response.

Get an overview of Microsoft Sentinel along with insights on active threats to your Microsoft 365 cloud and on-premises environments with an Microsoft Sentinel Workshop.

We will build an approach that’s best for you

This workshop can be customized to fit your environment and goals. We can provide:

Joint threat exploration

If your organization is interested in learning how to integrate Microsoft Sentinel in your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

Workshop objectives

- **Discover threats** to your Microsoft 365 cloud and on-premises environments across email, identity and data.
- **Understand how to mitigate threats** by showing how Microsoft 365 and Azure security products can help protect against threats that are found.
- **Plan next steps** and provide information to build a business case for a successful deployment of Microsoft Sentinel including a technical deployment roadmap.

In addition, you will also:

Get hands-on experience, discover & analyze threats using Microsoft Sentinel & automate your Security Operations to make it more effective. (Joint Threat Exploration scenario)

What we'll do:

Analyze your requirements & priorities for a SIEM deployment

Define scope & deploy Microsoft Sentinel in your production environment

Discover threats & demonstrate how to automate responses

Next steps on how to proceed with a production implementation of Microsoft Sentinel

Why work with us?

When it comes to security, you need an experienced partner. Synergy Technical has a long history of delivering successful cloud and on-premises security solutions to customers. With experience in all 50 states and 70+ countries, we have the technical expertise to get you up and running fast.
