

Cloud Security Assessment

Protect your organization's sensitive data, no matter where it lives or travels

If your organization wants to improve its agility by moving to Office 365—but is uncertain about security—Synergy Technical has an engagement that can help.

The Cloud Security Assessment workshop is designed to provide organizations with guidance on successfully implementing Office 365 security features and navigating compatible security solutions.

During this engagement, we will focus on your security objectives and requirements, cloud usage and adoption, regulations, and frameworks as well as the identification of any dependencies.

Included in the workshop:

A consultant certified in multiple cloud solutions will meet with you at your location for an interactive white-boarding session to review:

- Security concerns & requirements
 - Enhance your security & privacy to accelerate your path to compliance
- Current environment, security, & cloud technologies deployed
 - Assess services that are already deployed to better secure your data
- Identity & access management requirements
 - Set access policies and manage user identities to protect your users
- Information protection requirements
 - Automatically or manually classify your data based on sensitivity
- Increase IT efficiency while securing your enterprise
 - Better control user identity lifecycles with automated workflows

Want to find out more?

Synergy Technical has a long history of delivering successful cloud and on-premises security solutions to customers. The outcome of this assessment is an actionable road-map providing guidance, recommendations, and best practices on how to successfully implement Office 365 while meeting your organization's security requirements.
