Chrome Recorder Extension	<ul style="list-style-type: none"><li>• Simplify test case creation with an easy-to-use recording tool</li></ul>
In-Depth Reporting	<ul style="list-style-type: none"><li>• Auto capture images &amp; video playback for bug reproduction</li></ul>
Scalable Execution	<ul style="list-style-type: none"><li>• Run tests seamlessly across environments &amp; browsers</li></ul>

## TestKnot - How It Helps Organizations

Faster Release  
Cycles

- Automate end-to-end test flows to speed up deployments

Efficient QA  
Processes

- Reduce manual effort with structured test management

Improved Bug  
Tracking

- Capture issues instantly with detailed reports & video playback

Scalable Test  
Execution

- Run tests across browsers and environments
- Run tests from CI/CD or schedule regressions

Enhanced  
Collaboration

- Enable seamless coordination between QA, developers, and product teams
