

### Autonomous Agent in a Day: Unlock AI-Driven automation with Copilot Studio

Deploying AI-powered automation doesn't have to be complex. With Syntax's "Autonomous Agent in a Day" initiative, we guide you through the hands-on development of intelligent agents using Microsoft Copilot Studio. In just one day, you'll learn how to design, build and deploy conversational and autonomous agents that streamline repetitive tasks and enhance productivity.

## Solution Benefits

#### Faster Automation with AI Agents

Build intelligent agents that operate across systems, respond to users and take action

#### No-Code, Enterprise ready

Leverage Microsoft Copilot Studio to create and deploy agents fully integrated with your ecosystem

#### Real Business Value in a Day

Identify relevant use cases and see your first autonomous agent in action

## Benefits of Copilot Studio with Syntax

At Syntax, we bring deep process expertise together with Microsoft Copilot Studio to deliver real-world AI automation for your business. Our experts help you build agents that understand user intent, trigger workflows, and interact with your enterprise systems. With Syntax as your partner, you benefit from intelligent, scalable solutions that elevate your operations — without increasing IT complexity

## Technologies / Solutions in Use

# The Solution

Syntax “Autonomous Agent in a Day” workshop is designed to help organizations quickly understand and leverage Copilot Studio. In a collaborative setting, we identify automation opportunities, build real agent prototypes, and demonstrate how AI-driven assistants can transform your day-to-day processes.

What is included:

- Use-case discovery and process analysis
- Hands-on Copilot Studio workshop
- Development of your first autonomous agent
- AI integration scenarios for Microsoft 365, SAP and more

## Your Benefits at a Glance

Rapid Prototyping in One Day: Walk away with a fully functional agent tailored to your business use case after just one session

Improved Efficiency through AI: Enhance productivity by automating tasks and reducing manual effort

Future-Proofing with Microsoft Ecosystem: Seamlessly integrate with Teams, Power Platform, and Dynamics 365

Expertise that Delivers: Leverage Syntax’s proven expertise in SAP, ERP, and automation to drive impactful results

## Why we are your perfect partner?

### The best of both worlds: AI meets Enterprise Expertise

At Syntax, we combine deep SAP and ERP expertise with the powerful capabilities of Microsoft Copilot Studio to develop intelligent, autonomous agents tailored to your business needs. From automating approvals to streamlining service requests and enabling 24/7 user support, we turn AI into measurable value. With Syntax, your path to enterprise-ready autonomous agents is fast, secure, and built for scale.
