

# Cyber Security Assessment

## ABOUT Cyber Security Assessment Service:

One of the key problems of the business today is cybersecurity. Organizations are looking for a way to check their security status quickly and simply.

The Cyber Security Assessment Tool (CSAT) provides insight into vulnerabilities based on data from the company infrastructure and Office 365 through automated scans and analyses.

**Cloud Services** – Managed Service Provider and Azure Expert MSP – helps organizations to scan all the infrastructure, collect the results and provide them with final report and step-by-step recommendations.

## WHAT WE OFFER

### Automated data assessment

Scanning all the endpoints and other systems in the network, Active Directory and Azure AD, Office 365, SharePoint Online, Teams and Intune

### Interaction

Collecting relevant information through with a questionnaire

### Assessment results

Providing the final report and corresponding advices, documentation

### Technical support

Incident Management 24/7  
SLA

## WHAT OUR CUSTOMERS ARE SAYING

*"We were looking for a way to check the security status quickly and simply. Also, to get insight into our vulnerabilities, based on data from the infrastructure and Office 365. With the solution provided by Cloud Services, we automatically scanned all the infrastructure to reveal the weak sides. Also, based on the scan results we got absolutely clear step-by-step instructions on how to significantly increase the cybersecurity level in the shortest time. "*

– Serhii Smoktiy, CTO at Delivery Group

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## WHY AZURE

### Be future-ready

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

### Build on your terms

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

### Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

### Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
