# MIGRATION TO AZURE "LIFT&SHIFT"

Move workloads to Azure with speed and accuracy and ensure cost-performance optimization at the moment applications migrate.

This engagement is suitable **for the customers willing to migrate resources to cloud.** Syntegra suggests you assessment, migration scenarios, testing and providing migration of your assets to Azure.

The scope of the service covers pre-migration tasks, migration of the resources to Azure and testing.

**Before Migration:**

- Compute, network, storage, databases assessment;
- Automated dependency mapping (applications, databases);
- Selection of migration scenarios and tools, risk assessment;
- Azure cost calculation, TCO planning, machine sizing;
- Testing plans providing (compatibility, network connectivity, performance and load)

**Migration:**

- Migrate applications based on identified workloads;
- Migrate databases from the existing system to Azure;
- Fine-tune application configurations for any teething issues;
- Verify migrated data and perform testing on the migrated application;
- Switch public DNS entries from the existing system to Azure;

**Technical staff training:**

- 2 hours consulting on Azure basics and administration;

Price fee for the service – $1000*.
Credit notes are available on demand.

*Varies on the number of VMs migrated, the price is indicated for up to 30 instances and 3 TB of data. In case of migration more estates the discount negotiable.
