90% of Global Enterprises to Adopt Integrated IaaS and PaaS Solutions

By 2024, it is projected that 90% of global enterprises will opt for integrated Infrastructure as a Service (IaaS) solutions from providers that also offer Platform as a Service (PaaS). As Sid Nag, Research Director at Gartner, highlights, "Strategic initiatives such as digital transformation will drive demand for multi-cloud and hybrid cloud environments, further fueling the growth of the IaaS market." However, Nag emphasizes that enterprises will increasingly require more robust and comprehensive service portfolios to effectively manage these complex environments.

In response to this growing demand, 凌群電腦 **Cloud Services Division** has been proactively expanding its capabilities through in-house innovation and strategic partnerships. The team now offers an end-to-end multi-cloud service portfolio, including private, public, and hybrid cloud architecture design, deployment, and migration, as well as managed services and maintenance (MSP). These services are designed to enhance business agility and empower enterprises to respond to market demands more swiftly.

凌群雲端技術服務

雲端技術支援
針對客戶雲端使用上的技術問題，給予相對的解決方案

雲端搬遷服務
協助客戶針對地端服務搬遷上雲或架設雲地整合服務

雲端架構規劃
協助客戶了解雲端需求，並針對需求規畫相對應的雲端服務

系統應用程式開發
依客戶所提需求，協助進行系統服務開發並架設在雲端服務

帳務管理服務
協助客戶以台幣進行付款，並開立發票。為客戶節省額外手續費.

人工智慧服務開發
依客戶針對AI相關服務需求，協助進行開發並架設在雲端服務
