Company

Syscon Solutions is an ERP product company, incorporated in the year 1996, with a focus on single ERP product Syscon Cronus. The objective is to provide Low cost, Simple, Scalable, Proven ERP solution with assured long-term support for the SMEs.

Product

Sycon Cronus is an Enterprise Resource Planning (ERP) solution targeted for Small and Medium Enterprises. The product has rich functional features covering most of the business process of the focused vertical. The modules are as follows:

- Sales
- Dispatch
- Purchase
- Inventory
- Finance
- Planning (BOM, MRP)
- Production
- Costing
- Quality
- Maintenance
- Payroll
- Info Engine (MIS)
- with all Local statutory Compliance

The customers can opt to implement selective modules and scale up progressively.

Technology & Version upgrades

Syscon Cronus is developed on Microsoft Technology. As a product company, Syscon provides constant version upgrades, assuring its customers of long-term support.

Competitiveness of SMEs

In the present global competitiveness, every business has both opportunity and competition at the same time. The following are the critical factors that lead the business:

- ✓ Innovation
- ✓ Do More with Less
- ✓ On Time Delivery & Quality
- ✓ Cost Effectiveness
- ✓ Productivity through Effective Management
- ✓ Satisfied Employees, Customers, Suppliers, Bankers and Shareholders

To cope up with such dynamics, the organisation essentially needs "Access to Accurate and Real-time Information" from anywhere, becomes key differentiator. This enables SMEs well informed & quicker decisions with effective MIS system.

Need for ERP in SMEs

In the initial stages, SMEs manage their information through an Accounting and Inventory system. As the business grows in terms of more Customers, Suppliers, Products, Locations as well as the transaction volume, resulting in delay in compiling their day-to-day and periodic MIS information. This is the stage, the need for ERP solution arises.

Focused Vertical

Manufacturing

- Electrical
- Electronics
- Pharma (Bulk Drug & Formulations)
- Engineering
- Plastic & Rubber
- Chemicals

Trading & More...

Delivery Models

Software as a Service (SaaS)

In this model, the SMEs can access the ERP through Internet without any Capital Investment and usage payments quarterly in advance. The server will be in a reputed datacenter which is safe and secure and the SMEs does not require any IT infrastructure.

On-Premise Model

In this model the SMEs can maintain their own IT infrastructure and maintain their ERP solution within their organization.

Implementation & Support

It is very essential for the SMEs to realize that ERP is not an IT or a Financial accounting project , but a cultural project of the organisation. Hence it calls for the focus of both Top management and User team to work closely.

Apart from the product, Syscon has also developed several tools and control systems to ensure smooth Training, Implementation and Support process and make the transition less complex as well as ensure long term support. The broad implementation steps are as follows:

- Installation (for On-Premise)
- Configuration
- System Study
- Master and Opening balance porting
- Training
- Post Implementation remote support
- Regular patch and upgrades

On-line Ticketing system

Syscon has an on-line ticketing portal, wherein the users can login in and post their requirements and register complaints. Syscon support team will get back with necessary resolution.

How an Enterprise can decide on an ERP solution?

- Vendor who has a vision to support the solution on long-term (Major customization has its own disadvantages)
- Solution that has all the functional and statutory features available ready made
- Vendor who has rich experience in this domain with reference customers
- Vendor who has done technology,business and statutory upgrade over period of time
- Vendor who has function consultants having rich experience in your domain
- Initial Cost and AMC of the solution that fits into your budget

What is enterprise preparedness before going in for an ERP solution?

- Management and users having real interest and commitment to implement an ERP system
- Complete enterprise together evaluating the ERP system
- Keep the budget for ERP project (Hardware,Software, networking, Internet and intranet etc.,)
- Users taking training on the new ERP sytem and providing the Master data and opening balance
- System administrator for technical support
- Get on to the ERP system quickly and to deliver business value for the organisation
- To believe that an ERP system is not a competition,but a complementary for the organisation.
