Azure Cloud Migration Framework
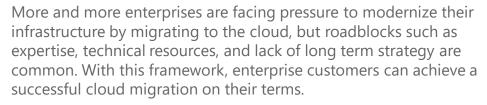

Get end-to-end cloud migration guidance from experts and build a winning cloud strategy on Azure.

More and more enterprises are facing pressure to modernize their infrastructure by migrating to the cloud, but roadblocks such as expertise, technical resources, and lack of long term strategy are common. With this framework, enterprise customers can achieve a successful cloud migration on their terms.

What is the Azure Cloud Migration Framework?

With a one-day workshop and subsequent assessment, Sysgain's Azure Cloud Migration Framework helps customers through every step of the migration process. Sysgain Azure experts will provide guidance and services to get your business up and running on the cloud and provide continued tech support after your workloads are migrated.

Why Customers Use the Azure Cloud Migration Framework

- Minimizes hassle or difficulties in migration.

- No-commitment workshop and assessment means there are no surprises.

- Gain knowledge and training on the Azure cloud platform.

- Continued support and CSP hosting options from Sysgain provide long-term benefits.

- Positioned for long term success in the Azure cloud.

Azure Expertise

- Personalized migration plans and training for each customer.

- Access to cloud experts and their knowledge base of cloud migration methodologies.

Sysgain provides access to premium knowledge and expertise.

End-to-End Migration

- Envisioning, planning, ROI/TCO estimation, and workload assessment all in one package.

- Post-migration optimization of workloads to maximize productivity and minimize cost.

Agile and strategic cloud migration services.

24/7 Support

- Ongoing support for cloud environments, no need for knowledge transfer.

- Cloud Solution Provider (CSP) savings and add-on benefits available.

Continued support and peace of mind.
