Our Technology Partners

Security Operation Center Services

24/7 Monitoring
Systems SOC will do log collection and round-the-clock vigilant event log monitoring, to help early detection.

Shift Notification
For each shift, i.e., three times a day, you will receive a shift notification through email in which you know who is the current shift security consultant. You can approach him/her if you need any assistance or have any questions .

Incident Response
An onsite or remote incident responder will work with your IT and business team to help contain and mitigate threats with complete damage assessment and response planning capabilities.

Training & Awareness Session
Your team/staff will get the security training session for the awareness of cyber security. Security awareness training is a strategy to prevent and mitigate risk. Such trainings are designed to help users and employees understand the role they play in helping to combat information security breaches.

Vulnerability Assessment
Vulnerability assessment refers to the process of identifying risks and vulnerabilities in computer networks, systems, applications, and other parts of the IT ecosystem. We do VA at the time of asset integration.

Security Advisories
Vulnerability disclosure is an area where collaboration between vulnerability reporters, such as security researchers, and project maintainers is very important.

SIEM Assessment
Systems engineering team will perform initial SIEM maturity assessment and will provide the assessment report.

Asset Integration
Systems Engineering team will perform unique out-of-box asset integration with support of your team.

Use Case Development
Our services include advanced security analytics with contextual analysis powered by big data analytic platform using threat intelligence services.

SOAR Assessment
SOAR assessment works by focusing on your strengths and how they can be leveraged to take advantage of the opportunities facing your organization.

Threat Intelligence
Our team aggregates and correlates thousands of security events using a multi-tenanted security information and event management (SIEM) environment and threat feeds. You will get the cyber security threat Intelligence on high priority.

### DFIR – Digital Forensics & Incident Response
Our team aggregates and correlates thousands of security events using a multi-tenanted security information and event management (SIEM) environment and threat feeds. Root Cause Analysis
