SysTools Access Password Recovery Tool

Tool to Quickly Retrieve Lost or Forgotten MS Access Database(.mdb) Password

SysTools Access Password Recovery Tool is a specialized solution designed to recover or remove passwords from Microsoft Access Database files (.mdb). This tool enables users to quickly regain access to secured Access databases without risking data loss or corruption. Whether the password is complex or simple, the software ensures fast and reliable recovery, catering to individuals, businesses, and organizations handling password-protected Access files.

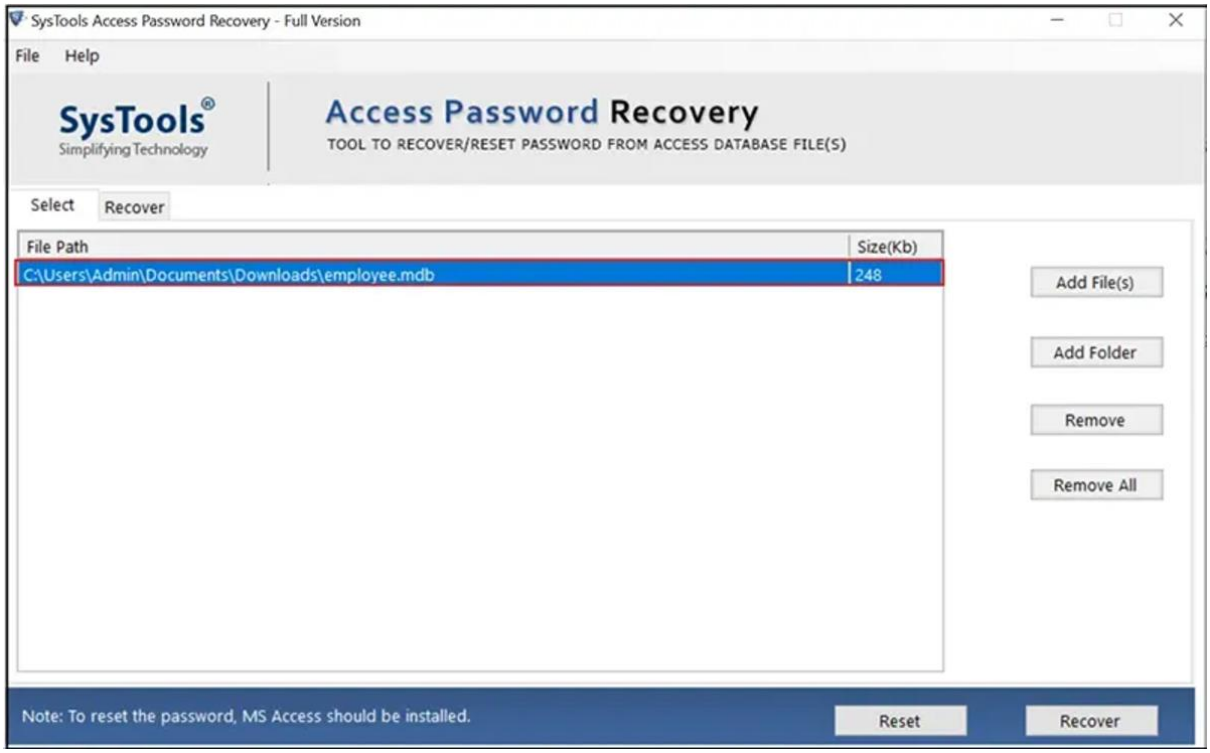
Note: Visit Official Webpage of **SysTools Access Password Recovery Tool**

Steps to Remove Password from Access Database (MDB) File Using SysTools Software

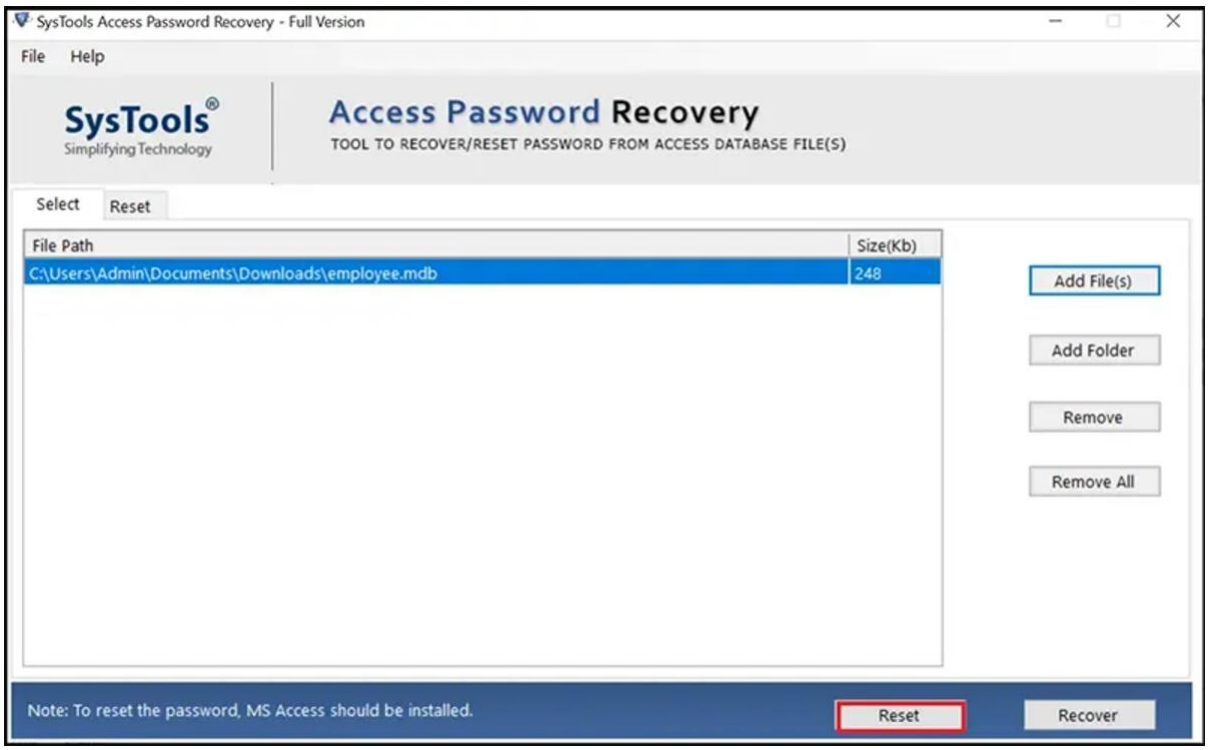
All the instructions are listed below, simply follow, and remove password from Access database (MDB file). Visit official webpage and download the utility and then install.

Step-1: Download & **Install SysTools Access Password Recovery** Tool. Next, Browse MDB File by **Add File(s) and Add Folder** Option.

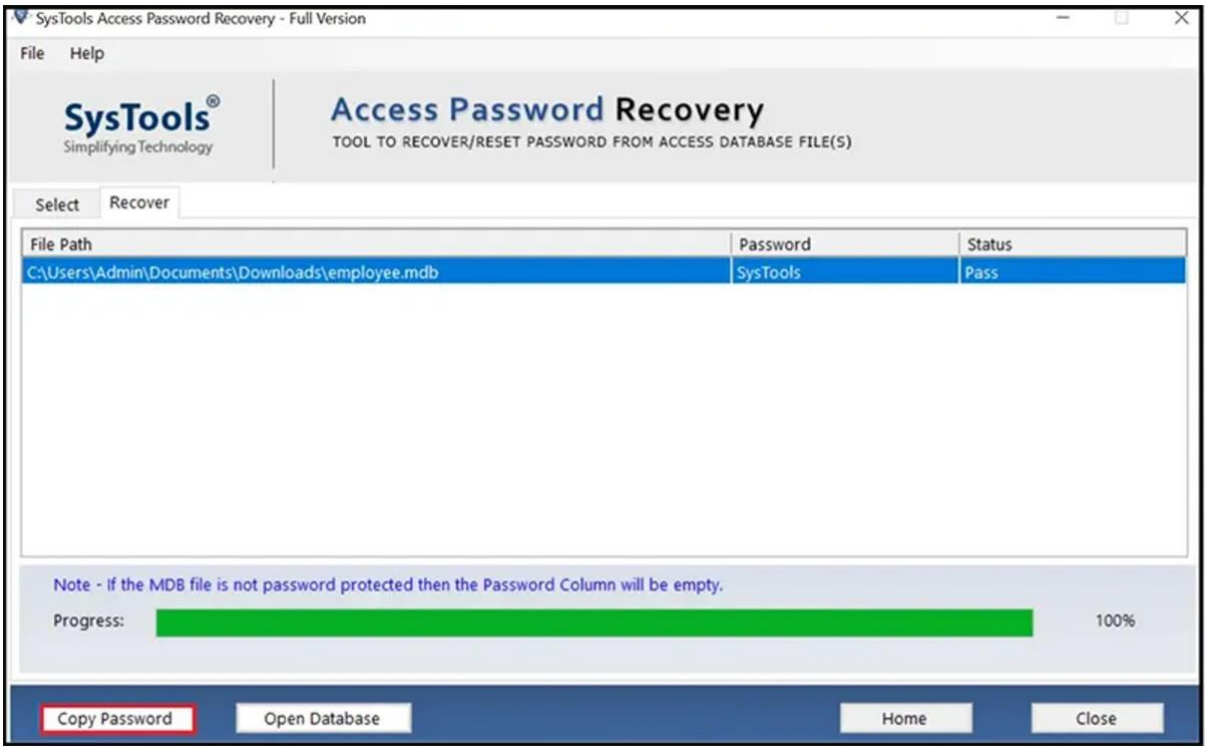
Step-2: After adding the file, the software will load it and display the added MDB files in the software panel. It will also display the **Selected File Path and File Size** (in KB).



Step-3: Next, Select the user whose password you want to reset Password and click **Reset Tab**.



Step-4: After that, the **"Reset process completed successfully"** screen will appear on the software interface. To continue, click the **OK** button. After the Open button has been clicked, a dialogue box will appear on the screen. Now click on the **Copy Password option** to copy the password of the selected MS Access MDB database file.



Final Points

- **Recover Forgotten Passwords**: Quickly retrieve lost or forgotten passwords for Access Database files.
- **Remove Password Protection**: Easily remove encryption for unrestricted database access.
- **Supports .mdb Formats**: Compatible with all Microsoft Access file types.
- **Batch Operations**: Process multiple database files in one go for maximum efficiency.
- **Broad Compatibility**: Works seamlessly with Access versions 2000 through 2019 and Office 365.
- **Data Safety Ensured**: Guarantees no changes to database content or structure during operations.
- **Standalone and Reliable**: No need for additional software dependencies.

SysTools Access Password Recovery Tool is an indispensable utility for recovering or removing passwords from Access databases, offering a secure, fast, and user-friendly experience for professionals and individuals managing encrypted Access files.
