## SysTools Access Database Recovery Tool

Tool to Recover Lost Data from Damaged & Corrupt MS Access Database (ACCDB & MDB) Files

SysTools Access Recovery Software is an advanced tool designed to recover and repair corrupted Microsoft Access database files (MDB and ACCDB). This powerful utility helps restore tables, queries, forms, macros, reports, and other database objects efficiently and securely.

Whether your database is damaged due to system crashes, malware attacks, or software errors, <u>SysTools Access Database Recovery Tool</u> ensures minimal data loss while maintaining the original database structure. Its intuitive interface makes it suitable for database administrators, IT professionals, and non-technical users alike.

## Steps to Recover Data from Access Database (ACCDB & MDB) File

All the instructions are listed below, simply follow, and recover data from MS Access Database ACCDB & MDB files. Visit official webpage and download the utility and then install.

**Step-1: Add Access Database**: Import damaged MDB or ACCDB files into the software for repair and recovery. After adding database file hit Recover button.

ns Help SysTools Simplifying Technology	Access Recove		55 DATABASE (MD	8/ACCDB) FILE	
elect MS-Access File :				Browse	Recover
TABLES					
		Export			

**Step-2:** After clicking on the Recover button Access Recovery software will start the recovery process.

## **Final Points**

- **Comprehensive Access Database Repair**: Repairs MDB and ACCDB files to recover all database objects.
- **Dual Scanning Modes**: Quick Scan for minor corruption and Advanced Scan for severe database issues.
- **Preview Before Export**: Provides a detailed preview of recoverable objects to verify data integrity.
- **Complete Object Recovery**: Recovers tables, queries, forms, macros, reports, and relationships.
- Deleted Data Recovery: Retrieves deleted tables or records for a thorough recovery process.
- Schema and Properties Retention: Maintains original database relationships, keys, and data properties.
- Large Database Support: Efficiently processes large-sized Access database files.
- Wide Compatibility: Supports all versions of Microsoft Access, including the latest.

SysTools Access Recovery Software is a trusted solution for repairing and restoring Microsoft Access databases, ensuring seamless recovery with precision and efficiency.
