## Steps to Import vCard Files into Outlook Mailbox Using SysTools Software

All the instructions are listed below, simply follow, and import vCard files to Microsoft Outlook mailbox. Visit official webpage and download the utility and then install.

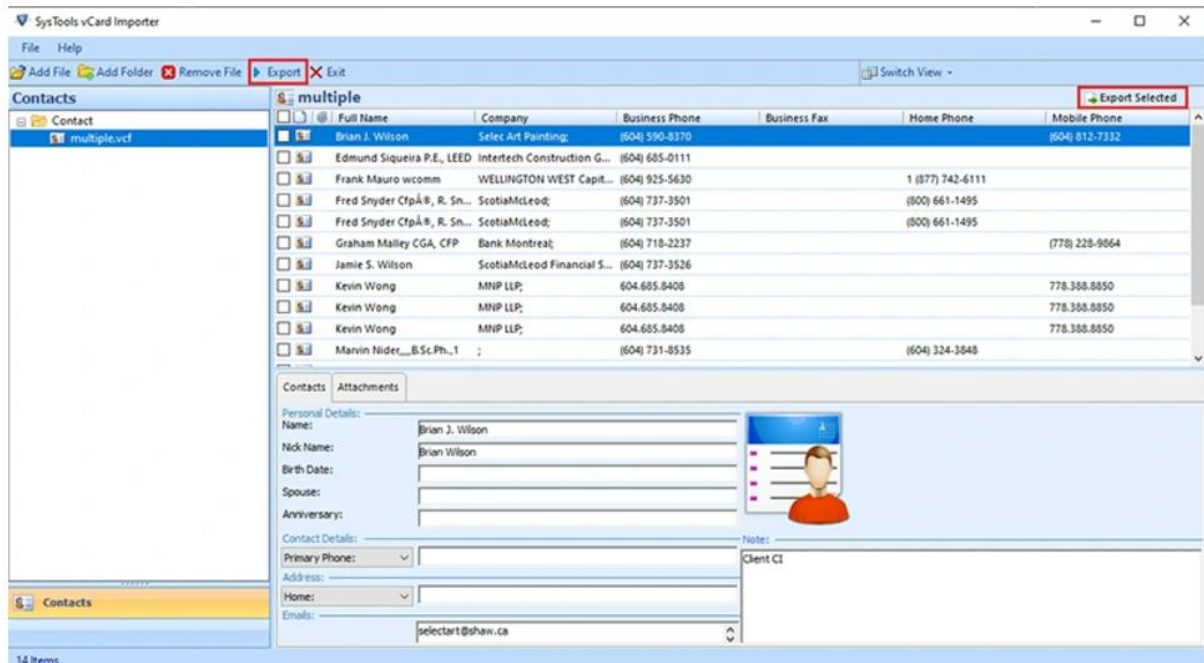

**Step-1: Start » All Programs » SysTools® vCard Importer.** Click on **Add File** button to add the desired vCard contact files into the software.

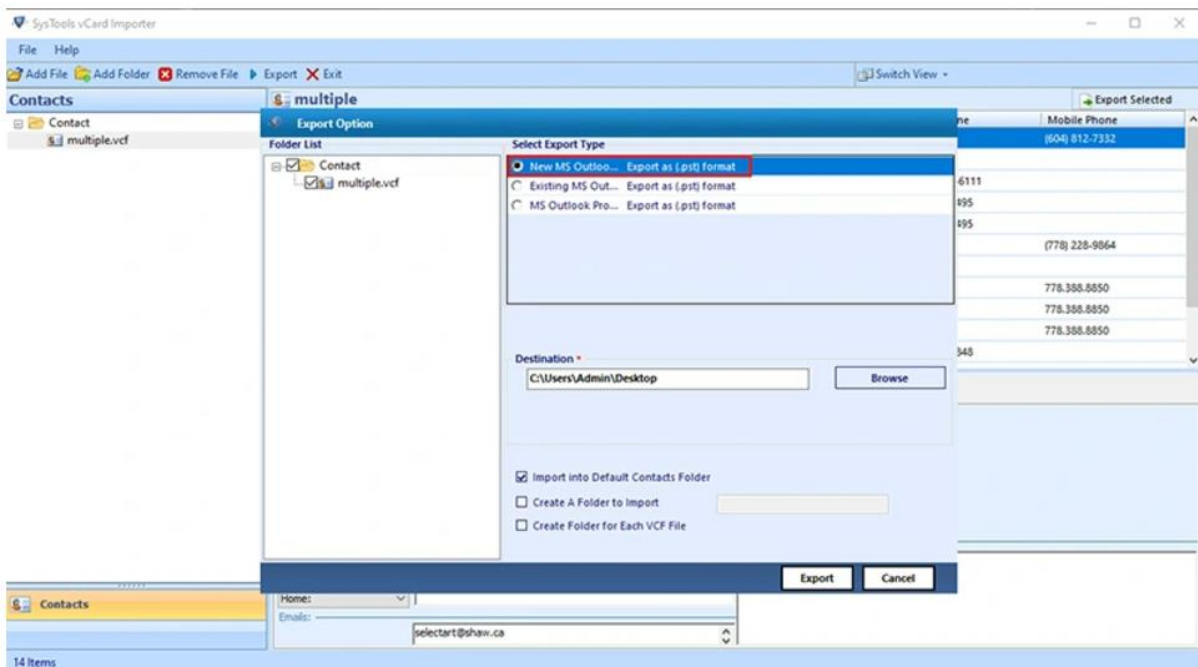

**Step-2:** Click on the desired files and click on **Open** to add them.

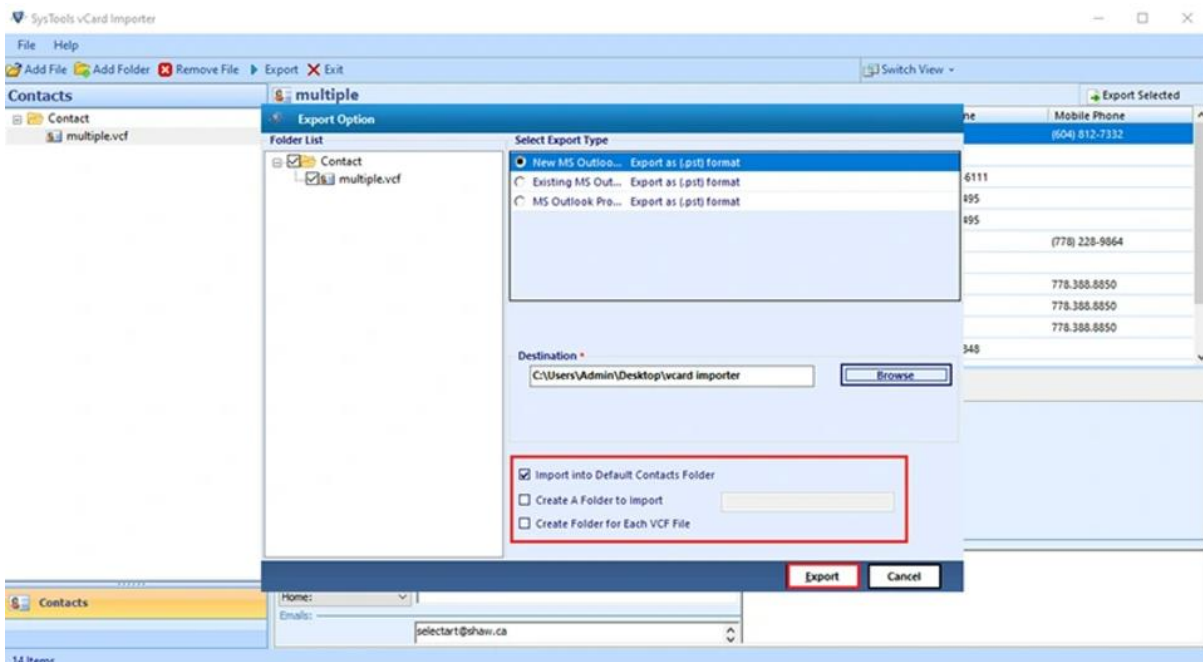

**Step-3:** Users can then have the preview of the added files. Now, choose the VCF files to convert into Outlook PST and click on the **Export** button in the top-left corner. If you want to import selective files then choose the **Export Selected** option.

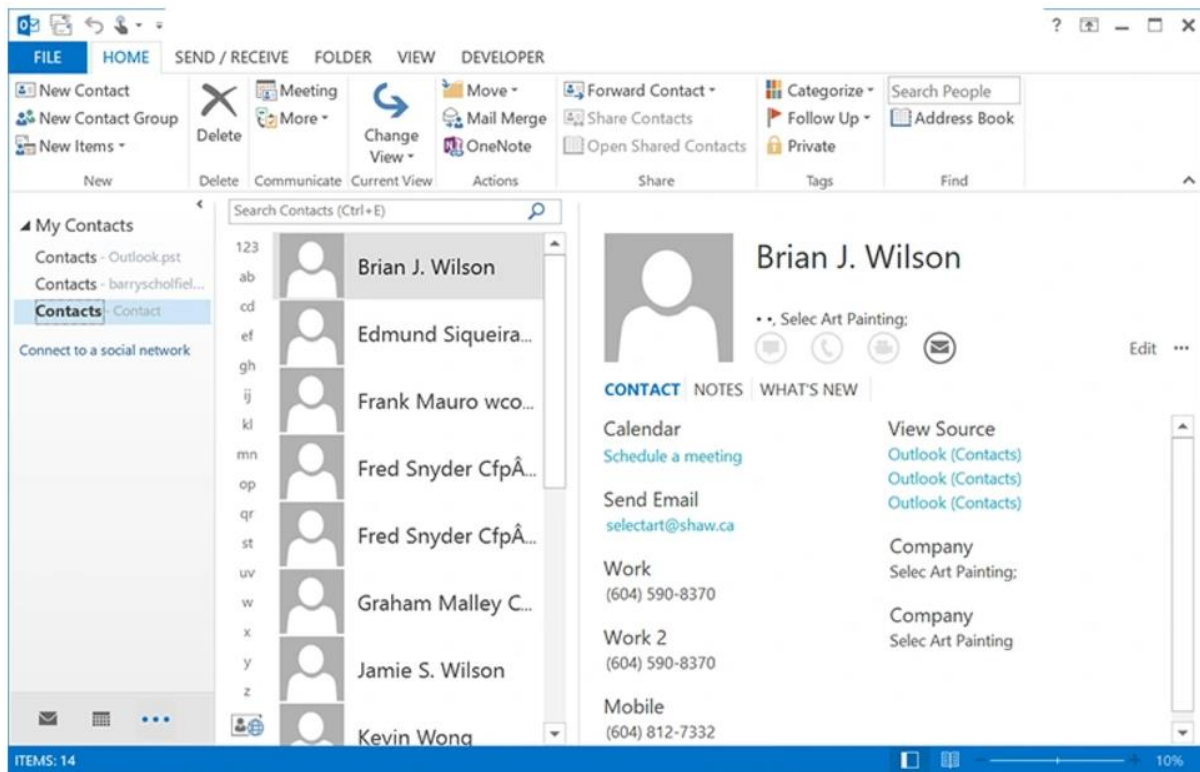

**Step-4:** After clicking the "Export button" the software will display various file formats. Select one from **New MS Outlook PST File, Existing MS Outlook File, MS Outlook Profile.**

**Step-5:** Choose from the options available and click on the **Export** button.

**Step-6:** Import the file into Outlook to have the preview of it.

## Final Points

- **Effortless Import:** Provides a reliable solution to transfer vCard contacts into Outlook PST or profiles.
- **Batch Capability:** Saves time by processing multiple vCard files in one go.
- **Data Preservation:** Ensures no loss or corruption of contact details during the import process.
- **Compatibility:** Works with all major vCard formats and Outlook versions.
- **Customizable Import Options:** Allows selective import of specific contacts based on user preference.
- **Ease of Use:** Intuitive design ensures a seamless experience for all users.

**SysTools vCard Importer Tool** is the ultimate solution for users looking to manage and transfer their contacts into Outlook efficiently. Its robust features and high compatibility make it an ideal choice for personal and professional contact management needs.
