SYVIR - Diagnostics Monitor

DM

Monitor your clients endpoints for faults.

 Specially designed for managed service providers to manage multiple clients endpoint diagnostics.
A RMM cloud tool, Syvir Diagnostics Monitor enables MSPs to do automatic diagnostic checks on clients endpoints for hardware faults.

Checks your clients Windows PCs, Servers, VMware and Hyper-V, for problems and failures. Receive alerts when issues are found
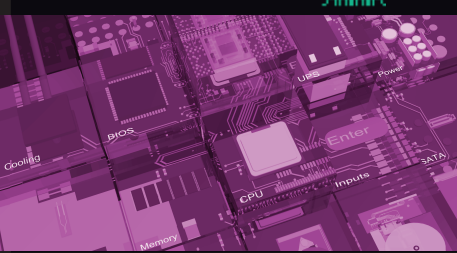

Cloud based, view diagnostic information through a web browser.

Produces .csv file reports for your clients on their endpoints health. Emails your clients any problems with their endpoints hardware.

Monitors the following PC/Server components-

Battery, BIOS, Cache Memory, CPU, DMA Channel, Fixed Drive, DVD/CD, Ethernet, Fan, FireWire, Heat Pipe, Keyboard, E-IDE/SATA, InfraRed, Motherboard, Desktop Monitor, Parallel, PCI, PCMCIA, Pointing, PSU, Refrigeration, SCSI, Serial, SMBIOS Memory, Sound, System Memory, Temperature, USB, Video, Voltage, Wireless.

syvir®

Monitor client endpoints from anywhere in the world.

DM

Syvir - Diagnostics Monitor is the easy way to find out
if any of your clients endpoints have hardware issues.
SYVIR DM works through a service probe on the target PC, Server or virtual machine.

The probe on the machine runs automatically.
Data is transferred through HTTPS

Data is transferred from the endpoint probe to the SYVIR DM cloud.

You can then view diagnostic data through a web browser or a Windows app.

Emails your clients daily with any problems with their endpoints hardware.
