AZURE
MIGRATION

END TO END MIGRATION MANAGEMENT

Digital & Cloud Services

OVERVIEW OF
THE SERVICE

Microsoft Azure is Microsoft's cloud-based alternative to physical hardware and services. Azure virtual machines run all Microsoft server products as well as a wide range of third-party products including Linux distributions and third-party software; it offers Software as a Service (SaaS), Platform as a Service (PaaS) and Infrastructure as a Service (IaaS). It comprises over 600 cloud services and supports variety of operating systems, databases, and development tools.

Cloud Adoption Framework brings together the best solutions from Microsoft of cloud implementation. It provides a set of tools, guidance, and narratives that help shape technology, business, and people strategies to achieve desired business outcomes during your adoption effort. Our assessment and migration programs follow the order to achieve the business outcomes.

SOFTWARE AS A SERVICE:

Software as a Service (SaaS) allows users to connect to and use cloud-based apps over the Internet. Examples are Microsoft Office 365, email, calendars and office tools. You can rent the application for your organisation and your users will connect to it over the internet.

PLATFORM AS A SERVICE - PaaS:

Platform as a Service (PaaS) is a complete cloud development and deployment environment with resources to deliver everything from simple cloud-based apps to sophisticated cloud-enabled enterprise applications. Examples of PaaS services include App Services, Azure Search and Azure CDN.

INFRASTRUCTURE AS A SERVICE:

Infrastructure as a Service (IaaS) is an instant computing infrastructure that is shared and managed over the internet. Examples are Azure Virtual Machines, virtual machine scale sets, and related networking infrastructure.

OUR SERVICES:

We provide analysis and assessments for Azure Migration. Build & migrate server's, applications to Azure and execute application remediation. Azure Managed Services to support you in managing the Azure after migrations.
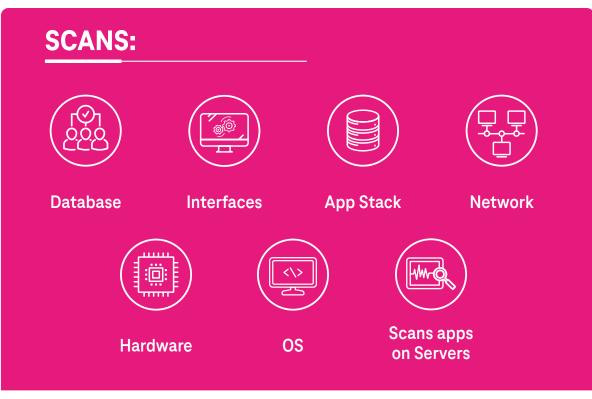

TOOLS

Our assessment tool is a platform which helps our clients to accelerate their Cloud Adoption Journey.

WE DELIVER:

(1) Cloud Readiness Analysis, Cloud compatibility, Cloud comparison application

(2) Re-Architecture/Re-Deployment scenarios, Business case for cloud migration to cloud

(3) We introduce predictability and use an adaptive data modeling approach on your cloudification journey MBAM solution.

OUR ASSESSMENT TOOL:

SCANS:

Database   Interfaces   App Stack   Network

Hardware   OS   Scans apps on Servers

ANALYSIS:

Cloud Heatmap   Business Factors   Workload   Topology   Operation Factor

BUSINESS **BENEFIT**

Migrating from existing environments to AZURE will bring enterprises many benefits

1 **SECURITY**

The most secured cloud environment

The data centers have two-tier authentication, proxy card access readers, hand geometry biometric readers, global incident response team

Azure environment is safeguarded with tools like Threat Intelligence, Advanced Threat Analytics, Azure Information Protection & Multi-Factor Authorization

2 **LOWER COSTS**

Simplified Infrastructure Management

Reduced IT and Network Maintenance

Reduced cost of infrastructure (Pay as you go option)

3 **SPEED & SCALABILITY**

Speed of Deployment

Speed of Operation

Speed of Scalabilty

Azure can scale up or down rapidly as needed

4 **FASTER TIME TO MARKET**

Rapid elasticity/Hyper-Scale

Broad Network Access

PaaS/SaaS to bring services

faster to the market

WHY **DIGITAL & CLOUD SERVICES?**

Digital Cloud Services is a company of Deutsche Telekom AG. We are a leader in Central and Eastern Europe and well experienced in providing cloud services from assessment over migration to management

- Agnostic analysis on cloud solutions to find best fit for you

- Mature partnership and registered Tier 1 Cloud Service Provider for Microsoft gives direct access to Microsoft resources

- Capability to manage end-to-end customer including connectivity

- High-end tools & framework for best in class service

- Tool is a complete transformation suite with capabilities to discover, assess, and migrate workload from on premise data centres to major public clouds such as Azure and GCP.

- Strong financial background and proven history in Central and Eastern Europe/ worldwidve guarantees long-term planning and investments

- International network of experts providing solutions in different countries at any scale

- Hassle-free migration and plannable, seamless operations through migration and managed services at defined, affordable prices. Cloud Adoption Framework (CAF) is adhered in all the assessments and migrations.
