

# GO2SAP on Azure

## ASSESS your SAP Environment

Conventional and In-house Platform, Database and operating models are more expensive and less flexible than today's multi-cloud solutions.

### GO2SAP on Azure. WHAT IS IT?

Our GO2SAP on Azure Assessment is a pre-sales workshop (also known as an Architecture Design Session (ADS)) that determines the customer's needs and requirements and evaluates their SAP environment. GO2SAP on Azure Assessment delivered by SAP certified Partner to discuss platform capabilities, goals and requirements in order to propose solution roadmaps, and high-level design for moving SAP to Azure.

### WHAT WILL WE DELIVER?

#### IT ENVIRONMENT ANALYSIS

- Discover: SAP landscape as input for the onsite assesment workshop
- Assess: Onsite workshop to learn Customer requirements for migration
- Deliver: Phased migration plan

#### BUSINESS CASE AND GUIDANCE

- Cloud migration feasibility analysis
- Total Cost of Ownership analysis
- License/infrastructure cost estimations
- Migration plan

### Business benefits

Our Go2SAP on Azure Assessment helps large enterprises organization migrate SAP to Azure infrastructure.

It collaboratively supports CIOs to find the answers to critical questions, such as:

- Scalability on demand On-premises vs Azure?
- Disaster recovery through Azure Site Recovery vs Infrastructure On-premises?
- What would be my costs and ROI using cloud?

### HOW WILL WE WORK WITH YOU?

Our SAP & Cloud experts will analyze, and fine tune gathered information to prepare detailed assessment report. It will advise on migration strategies and financial aspects of the migration and projected costs of new cloud environment. Finally, we will help you develop a solid feasibility study for migrating your IT SAP infrastructure to the cloud.

So if:

- Your data center contract where SAP is hosted (owned or hosting provider's) coming up for renewal.
- Your SAP ERP or SAP Business Warehouse application hardware is nearing end of life or due for a refresh.
- You have a plan to move to SAP HANA database for any of their SAP applications (ECC, BW, APO, CRM etc.).
- You plan to deploy or migrate to SAP's S/4HANA ERP.
- You have a compelling business event i.e. mergers & acquisitions.

Let's get in touch, let's discuss opportunities.

**Cloud Readiness Analysis | Cloud Compatibility | Cloud Comparison | Business Case for Cloud  
| Migration to Cloud**

### WHAT YOU GET?

- delivery of tailored resources in line with business needs
- Flexibility and Scalability in terms of infrastructure, performance, operating model, price model
- Cut operating costs
- Structured, end-to-end migration to SAP S/4HANA
- Unmatched quality in the management of SAP applications (Zero Outage program)
