

Artificial intelligence readiness assessment

Mobilize the full potential of AI in your organization with a sound framework and actionable, secure steps to implement effective governance.

6-8 week engagement

As AI systems become more fundamental to business operations, organizations must ensure their adherence to the secure, ethical, and responsible use of their AI solutions. With a proven approach, our governance and risk readiness assessment evaluates the ethical, legal, and operational aspects of AI systems, with a focus on protecting data, meeting regulatory requirements, and managing and mitigating risks.

By ensuring alignment between organizational objectives/values and the use of AI technologies, you will garner the strongest return on your investment. Our framework will empower the institution policies and procedures that ensure accountability, responsibility, and security and oversight, leveraging Azure AI & Copilot Studio, Security Copilot, Purview, Priva, Entra, and other Microsoft services.

Expected outcomes

- ✓ A strong understanding of ethical and trustworthy use of AI
- ✓ Increased internal AI adoption & readiness
- ✓ Safer scalability of AI projects
- ✓ Stronger protection for your business and data

What's included

To be tailored to your organization's needs.
