Azure Migration Implementation

Seamlessly migrate your servers to the cloud, capitalize on the power of Azure, and create end-to-end value from your data.

4-WEEK IMPLEMENTATION

Ensure your Azure migration goes smoothly with an implementation process tailored to your organization's exact goals and needs. This collaborative 4-week (minimum) engagement will get your servers onto the cloud, optimize your usage, provide cost visibility, and elaborate on required governance and security measures.

Our migration service has been designed to help develop an effective strategy toward fully integrating cloud and hybrid IT, while providing lower risk and reduced complexity for your organization. The project will be tailored to fit your specific needs and may vary on scale, duration, cost, and complexity.

Key benefits

At the end of this engagement, you will have the following:

- ✓ Comprehensive assessment & migration plan
- ✓ Azure environment set up
- ✓ On-premises workloads & data migration to Azure
- ✓ Operational readiness
- ✓ Training & governance documentation

What's Included

To be tailored to your organization's needs.

	1. Workshop & Planning	2. Migrate to Azure	3. Optimize Environment
Objectives	• Capture business requirements, understand processes & related data migration • Identify & rank priority use cases • Roadmap migration activities	• Ensure data readiness • Scale migration based on requirements • Move on-premises workloads to Azure	• Prepare final documentation & training materials • Recommend & implement immediate improvements • Ensure operational readiness & integration • Provide a roadmap for future optimization
Activities	• Assess cloud environment readiness & develop recommendations • Develop a migration plan • Explore innovation(s) that could be included	• Migrate selected workloads to the cloud • Integrated operational processes • Cutover services to production • Stabilize the cloud environment (prior to hand-off)	• Document all governance & security framework • Train the selected team on Azure cloud use • Share best practices & lessons learned
Deliverables	• Findings document • The final list of selected use cases • Migration activities roadmap	• Workloads fully migrated to Azure • Operational processes & tools configured/deployed • Comprehensive Cloud Environment documentation	• Final implementation documents • Training materials • Recommendations & roadmap
Timing	• Week 1	• Weeks 2 to 4	• Week 4
Team	• Senior BA Consultant, Senior Cloud Architect, Senior Cloud Consultant		

At MNP Digital, our experienced advisors, problems solvers, and builders work collaboratively to understand your organization's challenges and goals and then solution seamlessly as an extension of your team.

With locations across Canada, our experienced professionals bring the industry and technical know-how needed to accelerate cloud transformation through the adoption of Power Platform, Dynamics 365, and a full array of Azure services and solutions.
