Grants Accelerator Assessment

Learn how our Grants Accelerator can help you digitize and automate your grants management processes, leveraging Microsoft Dynamics 365 and the Power Platform.

4-week

Assessment

There are many complexities involved in managing grants, and we understand that each granting organization has its own unique characteristics to consider. However, we also know there are common areas where technology can improve and streamline grant processes. Starting new technology projects can be a risk, which is why we developed the Grants Accelerator – a comprehensive resource that offers guidance, process patterns, and technical components that allow us to quickly set up grant solutions using Microsoft Dynamics 365 and Power Platform in the cloud.

Our approach involves working closely with your team, both from a business and technical standpoint. We'll assess your current grant processes and systems, sharing our own experiences and exploring the capabilities of the Grants Accelerator. This assessment will help you determine the potential benefits of implementing or modernizing your grants management process using the MNP Grants Accelerator and the Microsoft Dynamics 365 and Power Platform ecosystems.

Key benefits

This assessment can help you:

- ✔ Evaluate your current technology solution against the latest capabilities

- ✔ Identify opportunities to improve your internal and external user experience

- ✔ Envision how you can digitize and automate your grant processes

- ✔ Determine if the MNP Grants Accelerator can get you more rapid results

- ✔ Learn how to manage grants more effectively and increase your organization's visibility
