

Power BI Accelerator

Identify business intelligence (BI) opportunities and jumpstart Power BI adoption through the creation of new dashboards using existing data.

6-week implementation

This collaborative, 4-6-week engagement is focused on helping your organization fulfill its BI and reporting needs using Power BI and other Microsoft tools. MNP will work collaboratively with both IT and business teams to: set up a Power BI environment (if not already existing), capture and prioritize dashboard requirements, design and develop select dashboards, and train users on Power BI.

Upon the conclusion of the engagement, you can expect to have production-ready dashboards to deliver insights directly to end-users.

Expected outcomes

- ✓ Production-ready Power BI reports and dashboards, with automated updates
- ✓ Development documentation and end-user training
- ✓ Recommendations on Microsoft technologies to further enable data across the organization

What's Included

To be tailored to your organization's needs.

	1. Discovery & Wireframing	2. Dashboard Development	3. Handover
Objectives	<ul style="list-style-type: none">• Capture business requirements and understand processes and related data transformations• Create dashboard frameworks• Identify and rank priority use cases	<ul style="list-style-type: none">• Design the BI data model• Prepare the input data for dashboard development• Conduct reviews with business and technical users and incorporate feedback• Develop the final Power BI dashboards	<ul style="list-style-type: none">• Prepare final documentation and training materials• Recommend tools & services to extend dashboard functionality• Provide a roadmap for future Power BI report and dashboard development
Activities	<ul style="list-style-type: none">• Validate the state of the existing environment• Assess existing reports and dashboards• Conduct interviews and whiteboarding sessions	<ul style="list-style-type: none">• Build the data model and write queries for key metrics• Clean the data with input from technical teams• Design and develop Power BI report and dashboard based on wireframes	<ul style="list-style-type: none">• Document all reports and dashboards (data sources, calculation of metrics, etc.)• Train the selected team on Power BI and data modeling• Share best practices and lessons learned
Deliverables	<ul style="list-style-type: none">• The final list of selected use cases• Wireframes of the final dashboard designs	<ul style="list-style-type: none">• Transformed datasets and final data model• Final production-ready Power BI dashboards	<ul style="list-style-type: none">• Final dashboard documents• Training materials• Recommendation and roadmap
Timing	<ul style="list-style-type: none">• Weeks 1-2	<ul style="list-style-type: none">• Weeks 2-5	<ul style="list-style-type: none">• Week 6
Team	<ul style="list-style-type: none">• Principal Consultant (PT), Power BI Developer (FT)		

Our scalable team of expert advisors, problem solvers, and builders ensure you receive the specific skills and guidance you need to get the most out of your digital investments.
