

# SAP & Power Platform: Unlimited innovation

Empowering every SAP organization to do more with less.

## 2-week assessment

Leverage the power of our innovative integration service, merging SAP enterprise resource planning (ERP) with Microsoft Power Platform. Our SAP procurement solution template simplifies and accelerates the integration of SAP data with the Power Platform, transforming your procure-to-pay operations. By streamlining SAP interfaces on Power Apps and automating processes with Power Automate, we ensure efficiency and accuracy in data management.

This tailored offering, built on the robust foundation of SAP solution templates, not only enhances user experience and operational efficacy but also promises a rapid return on investment in a seamless, customized, and data-driven environment.

## Expected outcomes

- ✓ A better overall view and understanding of their data
- ✓ Add business value by streamlining processes
- ✓ Make smarter, faster decisions through a consolidated platform
- ✓ Enhance workflows and provide more transparency

# How we can help

To be tailored to your organization's needs.

## 01 Streamline and automate SAP procurement processes

With the SAP procurement solution template, individuals across all expertise levels can effectively streamline SAP screens and attributes into one consolidated Power Apps screen. This not only simplifies core SAP procurement processes, but also seamlessly automates background operations using Power Automate flows, empowering users to address business needs more efficiently.

## 02 SAP requisition management app

With the SAP requisition management app, a key feature of our SAP procurement solution, users at all levels can navigate SAP tasks with greater ease compared to the traditional SAP GUI. This app enables individuals to effortlessly view and modify existing requisitions, initiate new ones, and transform a requisition into a purchase order, enhancing workflow efficiency and simplifying requisition-related processes.

## 03 SAP vendor management app

With the SAP vendor management app, a component of our SAP procurement solution, users of all proficiency levels can swiftly and seamlessly perform functions in SAP, bypassing the complexities of the SAP GUI. This app empowers individuals to view, update, and create vendors, adding significant business value by simplifying processes and addressing vendor management challenges.

## 04 SAP vendor invoice management app

With the SAP vendor invoice management app, integral to our SAP procurement solution, individuals at every maturity level can efficiently navigate SAP functions without the intricacies of the SAP GUI. This tool facilitates users' ability to swiftly view recent vendor invoices, approve them for payment, and generate invoices against established purchase orders, driving operational efficiency and streamlining invoice-related challenges.
