

# T4S Partners' Azure JumpStart IaaS Proof of Concept

## Begin Your Cloud Journey with the Right Team

Organizations need to reduce their capital expenses and minimize the endless addition of servers, storage and IT infrastructure to support business demands. Microsoft Azure Infrastructure as a Service (IaaS) provides a scalable and flexible platform to provide a server infrastructure on-demand without investing in hardware or software.

The Microsoft Azure IaaS Foundation JumpStart will assist customers with the planning, designing and piloting of Microsoft Azure Infrastructure as a Service (IaaS). The offering has different lengths depending on the topics and features that are configured. We can deliver a full production-ready environment or a proof-of-concept deployment depending on the length of the engagement.

This JumpStart will assist in providing best practices and knowledge transfer in demonstrating the best way to maximize the benefits of utilizing Microsoft Azure.

## Ready to Start Your Journey?

To learn more about T4S Partners' Microsoft Azure IaaS JumpStart, contact our team at 303.379.4070 or email us at [info@t4spartners.com](mailto:info@t4spartners.com)

## Your JumpStart Advantages

- T4S Partners' consultants are experienced in assisting in designing and building Azure.
- Get started quickly to take full advantage of Microsoft Azure.
- Gain knowledge and insight on the best use of Azure according to your business goals and requirements.
- Leverage Azure to deploy a test and development environment with little to no capital investment.
- Gain insight into how other customers are using Azure to cut costs and be more agile.

## Microsoft Strategic Partnership

As a Microsoft Certified partner, we have been recognized for our expertise and contribution to developing and deploying Microsoft based solutions. Our track record in meeting the needs of our customers in deploying a wide range of Microsoft technologies across the solution portfolio provides our customer with the confidence to embark on business critical projects.

## What Can T4S Partners' 1 Hour Briefing Do for Me?

- Plan and design a Microsoft Azure IaaS subscription
- Build the network, storage and cloud within Azure
- Configure authentication based on best practices and application requirements
- Assist in activating either site-to-site Virtual Private Network (VPN) or ExpressRoute
- Deploy and configure Azure AD Connect in Azure
- Deploy virtual servers for production, test or development (Windows and Linux)
- Create a blob storage account and test with file transfer
- Knowledge transfer of Azure best practices

## Your Azure Migration Journey

### Assess

Start your Azure migration by discovering & assessing your on-premise apps, data, and infrastructure. Map dependencies across application and decide their priority for your cloud migration

### Migrate

Move your apps, data, and infrastructure confidently using our expertise. We can guide you through the process and assist with automating the cloud migration journey while minimizing business impact.

### Optimize

After the migration we will work with your team to streamline your cloud resources continuously to enhance security, improve performance and maximize your ROI.

T4S Partners is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team, providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Azure.

T4S Partners is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure, and we can share our knowledge with you and your team, so your organization can spend less time managing software and more time putting it to work.
