- ⮀ **Route planning, optimisation & tracking**
- ⮀ **Standard NHS forms digitisation**

TAAP Healthcare Transport Management Software Service is utilised by healthcare transport services to effectively manage the movement of patients, staff and healthcare consignments such as pathology samples, controlled drugs and reports.

The solution encompasses key functions for creating and managing bookings including allocation to driver routes, real-time updates and finance management with transfer cost calculations and invoicing. Safety and compliance are maintained through daily digital vehicle checks and on demand risk assessment forms.

WHY CHOOSE TAAP?

- An existing NHS software solutions provider
- Digital Transformation market leader
- Trusted by thousands of end users
- Cloud based and fully secure

BENEFITS

- ✅ Provides traceability for all patient, staff and health package transport movements
- ✅ Reduces operational and administrative costs with the elimination of manual processes
- ✅ Increases efficiency of the transport service with driver route optimisation and real-time status updates
- ✅ Ensures compliance with health and safety procedures
- ✅ Improves data security with a fully encrypted digital solution that enforces GDPR compliance
- ✅ Accurately calculates the cost of a transfer and generates invoices in real-time

TAAP HEALTHCARE

TRANSPORT MANAGEMENT SOFTWARE SERVICE

KEY FEATURES

MANAGE BOOKINGS FOR PATIENTS, STAFF AND PACKAGES

Create cost calculated bookings that contain movements required for patients, staff and packages.

ROUTE PLANNING, OPTIMISATION & TRACKING

Integrated mapping technology optimises both ad-hoc and fixed driver routes.

TRANSFER COST CALCULATIONS

Set price per mile calculations by service provider for quoting through to invoice and apply on and off peak rates and surcharges.

FULL TRACEABILITY

End to end visibility of driver and transport movements, status and location.

DIGITAL VEHICLE INSPECTIONS

Delivered through an easy to use mobile app that simplifies the data capture process for vehicle inspections.

INTEGRATED LOCATION LOOK UP

Uses an intelligent address lookup function and can store frequently visited locations for quick access when planning routes.

CONTACT MANAGEMENT

Easily create and manage booking services and their respective contacts.

FINANCIAL REPORTING & INSIGHTS

Shows insight into costs for invoicing of transfers for each booking service.

CROSS PLATFORM

All solutions are compatible with Windows, iOS and Android devices.

INTEGRATED SAT NAV

Integrated satellite navigation to easily navigate drivers to their destination.

CUSTOMISE MOVEMENT TYPES

Unlimited customised movement types can be added to the solution for example, internal mail, blood samples and controlled drugs.

FULL OFFLINE WORKING

Allow work to be carried out anywhere, anytime without the need for a signal.
