# AI Health Plan

AI chatbot for employers to help employees easily understand their healthcare coverage and benefits.

# Healthcare options simplified

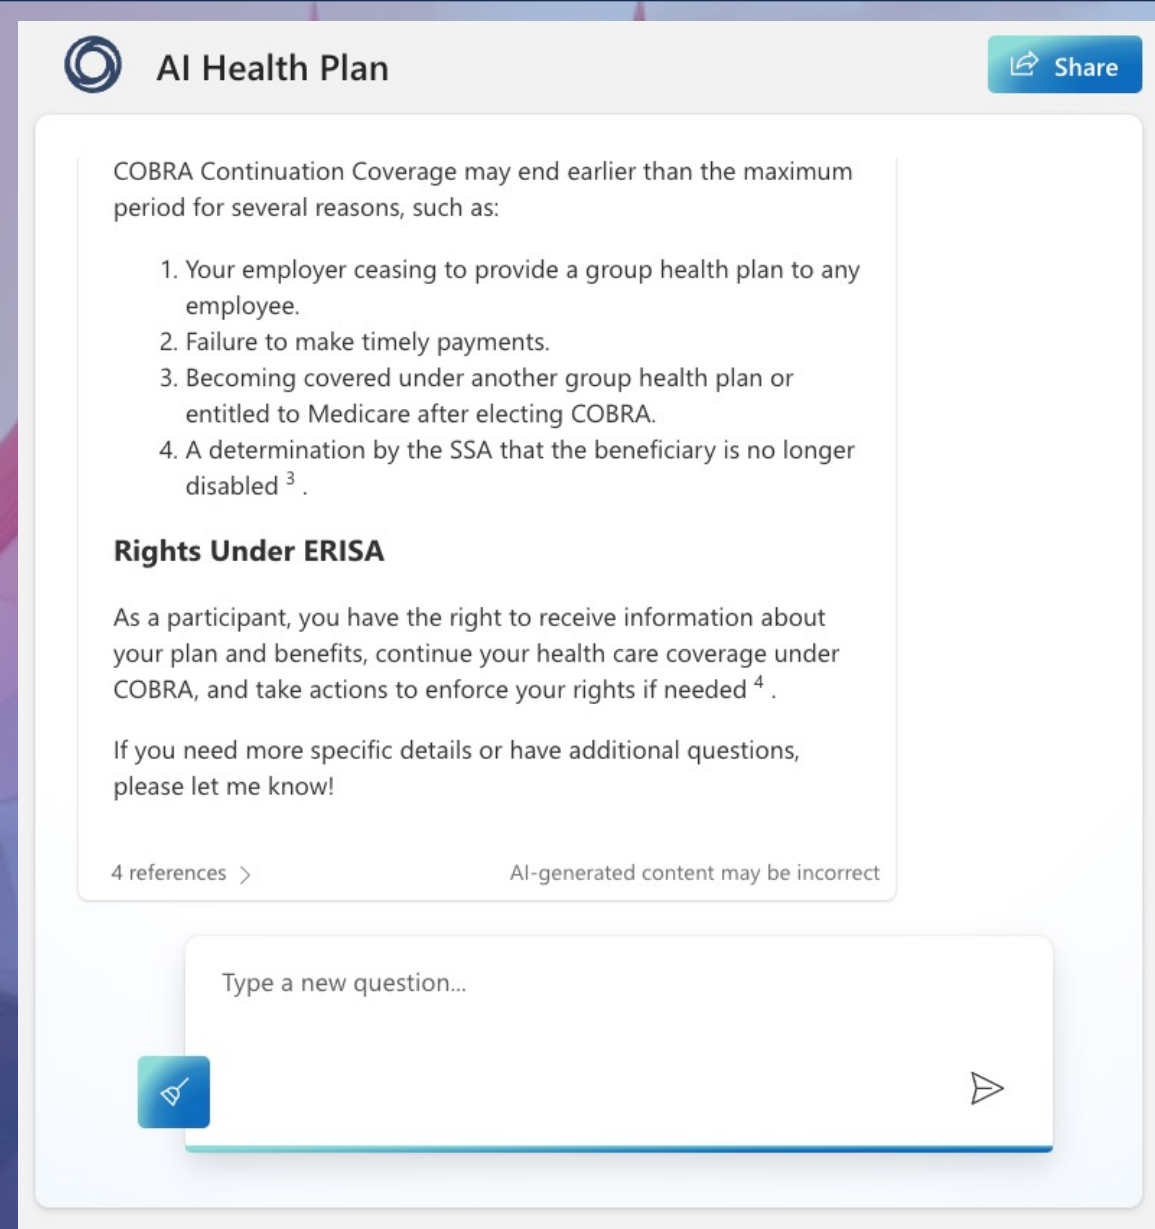

- Cloud-based generative AI chatbot designed to simplify healthcare navigation for your employees
- Trained on employer-provided health plan data
- The chatbot empowers individuals with employer-based healthcare coverage to easily access and understand their options

Example: Chatbot that enables employees to get info on their healthcare coverage based on company internal data.

# Healthcare options simplified

- Employees can ask questions, explore coverage details, and make informed decisions about their healthcare without needing to comb through lengthy, complex benefits guides.
- By providing clear, accurate, and personalized answers in real-time, our chatbot eliminates the frustration and confusion often associated with understanding healthcare plans.

The screenshot shows a chatbot interface titled "AI Health Plan" with a "Share" button in the top right corner. The main content area displays a response regarding COBRA Continuation Coverage. The text states that COBRA coverage may end earlier than the maximum period for several reasons, such as:

1. Your employer ceasing to provide a group health plan to any employee.
2. Failure to make timely payments.
3. Becoming covered under another group health plan or entitled to Medicare after electing COBRA.
4. A determination by the SSA that the beneficiary is no longer disabled<sup>3</sup>.

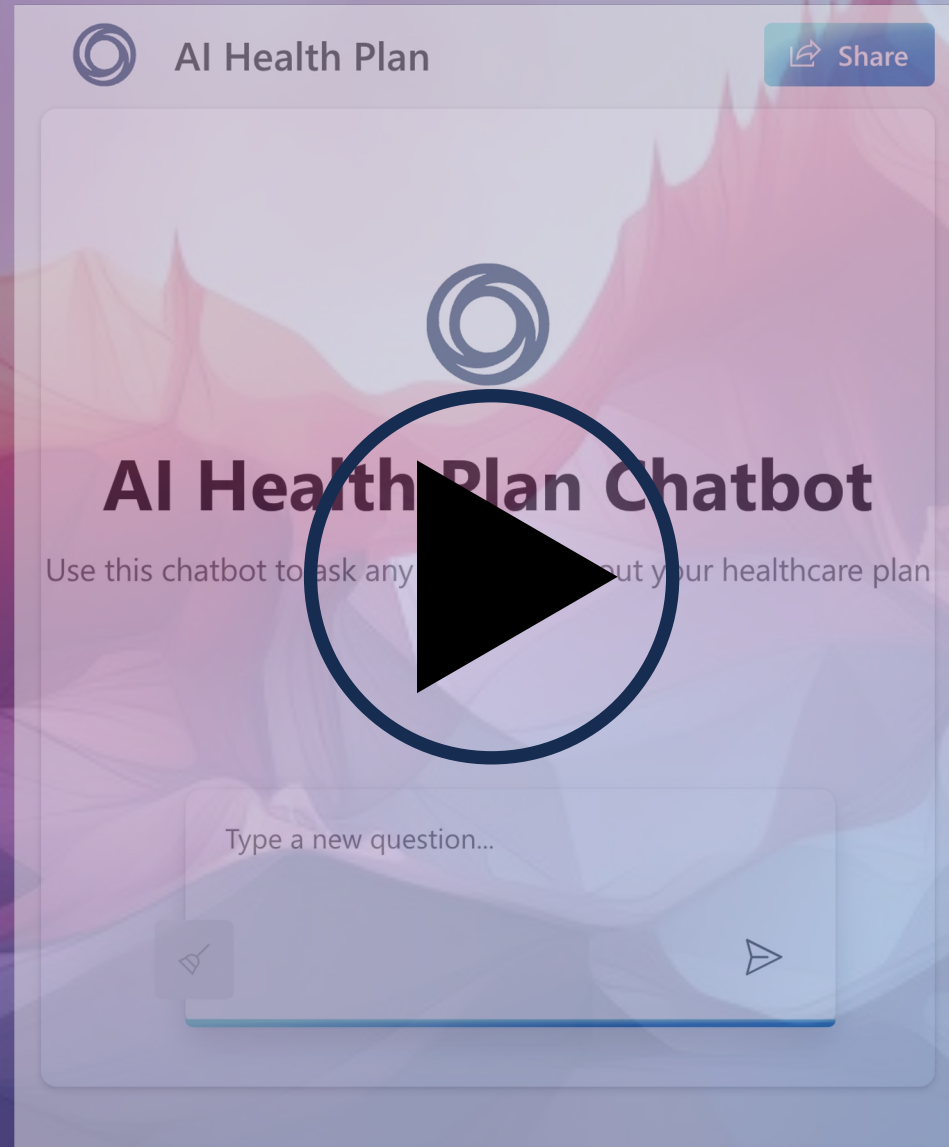

Below the list, the section is titled "Rights Under ERISA". The text explains that as a participant, one has the right to receive information about the plan and benefits, continue health care coverage under COBRA, and take actions to enforce rights if needed<sup>4</sup>.

The chatbot concludes with the text: "If you need more specific details or have additional questions, please let me know!".

At the bottom of the response area, there are two links: "4 references >" and "AI-generated content may be incorrect".

Below the response area is a text input field with the placeholder text "Type a new question...". To the left of the input field is a blue button with a white speech bubble icon, and to the right is a white arrow icon pointing right.

Example: Chatbot that enables employees to get info on their healthcare coverage based on company internal data.

[AI Health Plan Overview Video](#)

The background features a low-poly, abstract landscape with a color gradient from purple and blue on the left to red and orange on the right. A large, rounded, multi-colored shape (teal, blue, purple) is centered on the page, serving as a container for the text.
