

Azure PaaS Proof of Concept

Work with Tallan to educate your team on Azure and create a functioning POC that can drive business value for your organization

This 3 day engagement will allow your team to work with Tallan and Microsoft to educate your organization on what is possible in Azure and build out a POC utilizing Azure's PaaS services.

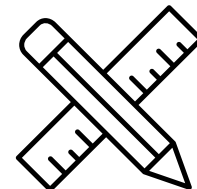

Agenda

- Outline proof of concept and what you are trying to accomplish.
- Go over the current environment application runs in (if any) and the architecture associated with it.
- Education on Azure tools and building workloads and applications in Azure/moving on prem applications and workloads to Azure.
- Work with Tallan team to develop and create your POC.

Deliverables

- Documentation of proof of concept, current architecture and best practices / recommendations for building and moving and workloads to Azure.
- Functioning POC for you to run with or work with Tallan to implement.

Experience Talent-Driven Innovation

Founded in 1985, Tallan provides technology and business process consulting services to enterprise and mid-sized companies, as well as government entities, with a focus on Custom Development, Portals and Collaboration, Business Intelligence, Application Integration, Mobile Platforms, User Experience, Ecommerce, Web Development, and Cloud Services.
