

Code First with Tallan

The Code-First concept was designed to help businesses accelerate a technology decision for new development projects. This engagement is a compressed version of the typical process (Solution Briefing, Architecture, Design Session, Proof-of-Concept), and can be scaled in duration according to the complexity of the use case.

Together with a Microsoft technical team, Tallan will bring its expertise to prove out the proposed use case. The condensed nature of this style of engagement typically caters to organizations that need to deliver products or applications and services in a short time frame and dramatically increases the success rate of new endeavors.

Benefits

Accelerate

Accelerated engagement through compressed delivery of Briefing, Design & Proof of Concept session, shifting the total duration of engagement from 2+ months, to 2-3 weeks

Nourish

Nourish a lean startup mentality to adopt modern Cloud Technologies and establish DevOps methodologies and best practices early in the solution development life-cycle

A Way Forward

Take what you have accomplished during this technical engagement and use it as a foundation for the future solution building phases with partners already intergrated with your development team(s)

Sample 3-Phased Approach

Each engagement is different. Depending on the goal of the Proof of Concept, this experience could be as short as one week, or as long as long as three weeks.

The complexity of your infrastructure and goal will determine the timeline, but, the sample below encompasses a high-level approach to what to expect from this Code-First opportunity.

Phase 1: Gathering Requirements and Briefings

- Introductions
- Business driver discussions to gather and understand requirements, priorities and user stories
- Deliverable review

Phase 2: Architecture, Design, and Proof of Concept

- Whiteboard design and architecture session
- Task and team assignments
- Begin implementation work
- Twice-daily stand-up meetings
- Integration and dry-run

Phase 3: Vetting Process and Potential Next Steps

- Final integration and solution demo
- Executive conversation(s)
- Knowledge share and documentation
- Next step discussion, if applicable
