DevOps Implementation

Move to Azure DevOps while improving your best practices around your entire DevOps Cycle.

## 3-4 Week Engagement

What to Expect

During this engagement you will work with Tallan to create best practices for Azure DevOps. We will work with you to get all your applications using the same build automation mechanisms for Azure Devops, and ultimately help you build your DevOps pipeline strategy.

During the Engagement

Agenda

- Create DevOps pipeline best practices for Azure DevOps
- Get all of your applications using the same build automation mechanisms for Azure DevOps
- Provide a quality and security inspection and confirmation of code built by vendors and other teams.

Deliverables

- Develop a DevOps pipeline strategy
- Branching/Merging strategy document
- Azure DevOps projects structure document
- Define the different stages we are going to use to structure the work and the builds
- Knowledge transfer to your internal teams
- Static Code analysis & technical debt report
- Security Scanning report for every build

Experience Talent-Driven Innovation
Founded in 1985, Tallan provides technology and business process consulting services to enterprise and mid-sized companies, as well as government entities, with a focus on Custom Development, Portals and Collaboration, Business Intelligence, Application Integration, Mobile Platforms, User Experience, Ecommerce, Web Development, and Cloud Services.
