

# Data and Analytics Services

Data is the backbone of your business. Tallan can help you build, grow, and optimize that data. Organizations of all sizes benefit from the increased business intelligence and enhanced security measures of a sound data estate. Strategizing, designing, and developing a modern data platform is an important step on the path to digital transformation and modernization.

## What We Can Help With

### Data Strategy

Get help assessing your current environment, and then designing your data strategy

### Business Intelligence

Position your organization for success and growth through analysis and reporting on your business data

### Machine Learning

Use your data to work smarter, not harder. A Machine Learning solution will enable predictive analytics, optimization efforts and more

### Data Management

Build and maintain a strong foundation for your data, in a secure and easy-to-navigate estate

### Big Data Solutions

Use big data to provide predictive analytics that enable and empower your team and enhance customer experiences

### Migration and Modernization

Whether you need to migrate your data, or need to restructure a platform or estate we have the insight to advise and ultimately help

## What We Can Offer

### Briefings

Introductory conversations about business intelligence and data analytics strategy, challenges, tools and

### Proof of Concepts

Test ideas before making a full investment to design or build out something new for your business

### Modernization Design Sessions

Assistance and guidance in helping design and develop new models, databases or platforms to ensure efficiency

### Assessments

Designed to help your organization understand where you are now, where you want to be, and how to get there

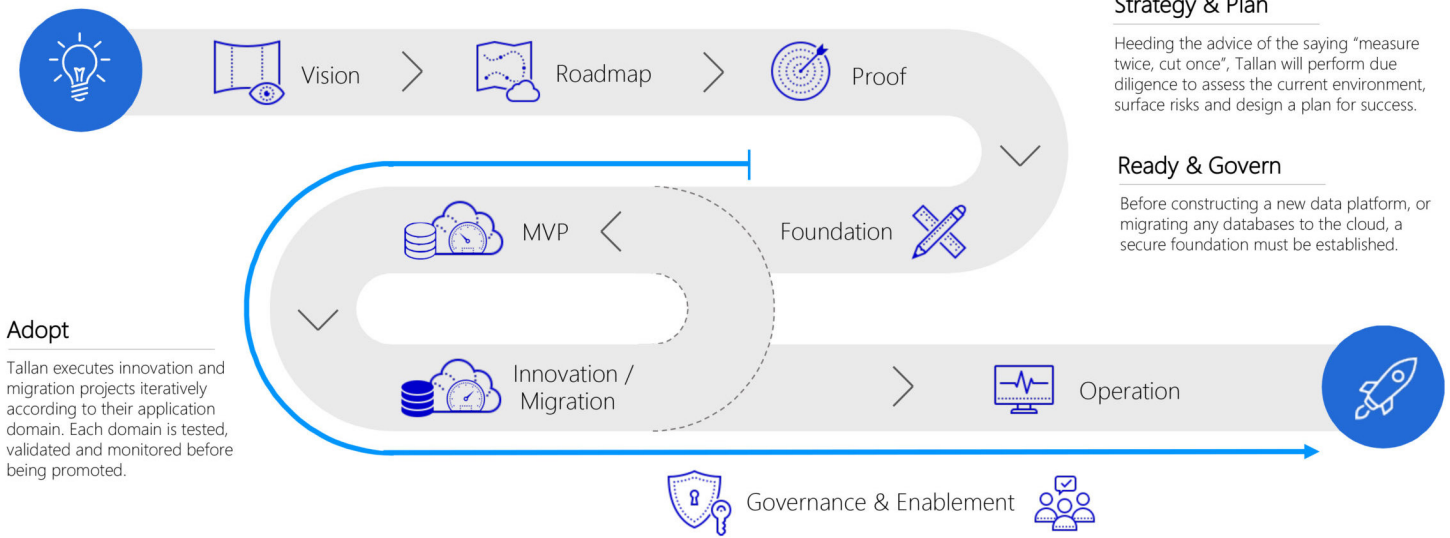

### Hands-on Training

A variety of different hands-on workshops meant to help your development or DBA team sharpen their skills and grow their knowledge of modern concepts and tools

### Migrations & Implementations

Migrate databases and workloads to the cloud in addition to implementing new tools and processes across your organization
