

Meet Ivy, Your AI Interviewer

Organizations are constantly seeking innovative solutions that can streamline the hiring process while ensuring quality assessments. Introducing Ivy AI, Talview's revolutionary AI interviewer that combines the best of all worlds for high-volume hiring. With the scalability of asynchronous interviews, the depth of live interviews, and the consistency of written assessments, Ivy AI is a game-changer in the recruitment arena.

Accelerate Your Screening Process with Ivy

Ivy is a conversational AI interviewer that scales and standardizes interviews across roles and industries. Powered by LLMs and presented through a lifelike avatar, Ivy mirrors real interviewer behavior—asking job-specific questions, adapting in real time, and delivering structured, competency-based evaluations. It helps you save time, reduce hiring costs, and free up valuable HR resources.

-  **Faster Screening:** Make your first round of screening 80% faster and reduce time-to-hire.
-  **Continuous Availability:** 24x7 availability to support global, high-volume, and asynchronous hiring needs.
-  **Scalable Interviews:** Run thousands of interviews seamlessly without looking at interviewer availability.
-  **Increased Candidate Attendance:** Flexible mobile access and anytime availability help reduce interview no-shows.
-  **Better Signals:** Gain richer insights and structured feedback, to make informed hiring decisions
-  **Improved Equity:** Fairer evaluations and bias-free evaluations.

- **Depth of Live Interaction:** Offers an interactive experience similar to live interviews. With real-time listening, follow up questions and observation capabilities.
- **AI Avatar-led Video Interviews:** Conduct interviews with customized AI avatar based on your brand identity or mapped to job role competencies.
- **Multi-Lingual:** Supports multiple languages and diverse accents, making it ideal for global organizations and candidates.
- **Visual Cue Monitoring:** Identifies proxy candidates and recognizes signs of distraction or external assistance during the interview.
- **Smart Interview Reports:** Ivy generates reports with actionable insights, so you choose the best candidate. Save 30-50% evaluation time per candidate.
- **Real-time Transcription & Recording:** Each session is recorded and transcribed for future reference, audits, and transparency.
- **Structured and Consistent Assessments:** Offer a bias-free interviewing experience to candidates with structured reports.

Ivy vs. Other AI Interviewing Tools

Features	Other AI Interviewing Tools	Ivy
